

CONTENTS

Preface	xv
1 Basics	1
1.1 Sets	1
1.2 Operations on Sets	2
1.3 Functions	3
1.4 Operations on Functions	4
1.5 Number Systems	5
1.5.1 The Real Numbers	6
1.6 Countable and Uncountable Sets	8
2 Sequences	13
2.1 Introduction to Sequences	13
2.1.1 The Definition and Convergence	13
2.1.2 The Cauchy Criterion	14
2.1.3 Monotonicity	15
2.1.4 The Pinching Principle	16
2.1.5 Subsequences	16
2.1.6 The Bolzano-Weierstrass Theorem	17
2.2 Limsup and Liminf	18
2.3 Some Special Sequences	19
3 Series	23
3.1 Introduction to Series	23
3.1.1 The Definition and Convergence	23
3.1.2 Partial Sums	24
3.2 Elementary Convergence Tests	25
3.2.1 The Comparison Test	25
3.2.2 The Cauchy Condensation Test	25
3.2.3 Geometric Series	26
3.2.4 The Root Test	27

3.2.5	The Ratio Test	27
3.2.6	Root and Ratio Tests for Divergence	28
3.3	Advanced Convergence Tests	30
3.3.1	Summation by Parts	30
3.3.2	Abel's Test	30
3.3.3	Absolute and Conditional Convergence	32
3.3.4	Rearrangements of Series	33
3.4	Some Particular Series	35
3.4.1	The Series for e	35
3.4.2	Other Representations for e	35
3.4.3	Sums of Powers	36
3.5	Operations on Series	37
3.5.1	Sums and Scalar Products of Series	38
3.5.2	Products of Series	38
3.5.3	The Cauchy Product	38
4	The Topology of the Real Line	41
4.1	Open and Closed Sets	41
4.1.1	Open Sets	41
4.1.2	Closed Sets	42
4.1.3	Characterization of Open and Closed Sets in Terms of Sequences	42
4.1.4	Further Properties of Open and Closed Sets	43
4.2	Other Distinguished Points	44
4.2.1	Interior Points and Isolated Points	44
4.2.2	Accumulation Points	45
4.3	Bounded Sets	46
4.4	Compact Sets	47
4.4.1	Introduction	47
4.4.2	The Heine-Borel Theorem	47
4.4.3	The Topological Characterization of Compactness	48
4.5	The Cantor Set	49
4.6	Connected and Disconnected Sets	51
4.6.1	Connectivity	51
4.7	Perfect Sets	52
5	Limits and the Continuity of Functions	55
5.1	Definitions and Basic Properties	55
5.1.1	Limits	55
5.1.2	A Limit that Does Not Exist	56

5.1.3	Uniqueness of Limits	56
5.1.4	Properties of Limits	57
5.1.5	Characterization of Limits Using Sequences	59
5.2	Continuous Functions	59
5.2.1	Continuity at a Point	59
5.2.2	The Topological Approach to Continuity	62
5.3	Topological Properties and Continuity	63
5.3.1	The Image of a Function	63
5.3.2	Uniform Continuity	64
5.3.3	Continuity and Connectedness	66
5.3.4	The Intermediate Value Property	67
5.4	Monotonicity and Classifying Discontinuities	67
5.4.1	Left and Right Limits	67
5.4.2	Types of Discontinuities	68
5.4.3	Monotonic Functions	69
6	The Derivative	71
6.1	The Concept of Derivative	71
6.1.1	The Definition	71
6.1.2	Properties of the Derivative	72
6.1.3	The Weierstrass Nowhere Differentiable Function	73
6.1.4	The Chain Rule	74
6.2	The Mean Value Theorem and Applications	75
6.2.1	Local Maxima and Minima	75
6.2.2	Fermat's Test	75
6.2.3	Darboux's Theorem	76
6.2.4	The Mean Value Theorem	76
6.2.5	Examples of the Mean Value Theorem	78
6.3	Further Results on Differentiation	80
6.3.1	l'Hôpital's Rule	80
6.3.2	Derivative of an Inverse Function	81
6.3.3	Higher Derivatives	82
6.3.4	Continuous Differentiability	82
7	The Integral	85
7.1	The Concept of Integral	85
7.1.1	Partitions	85
7.1.2	Refinements of Partitions	88
7.1.3	Existence of the Riemann Integral	89
7.1.4	Integrability of Continuous Functions	89

7.2	Properties of the Riemann Integral	90
7.2.1	Existence Theorems	90
7.2.2	Inequalities for Integrals	91
7.2.3	Preservation of Integrable Functions Under Composition	91
7.2.4	The Fundamental Theorem of Calculus	93
7.2.5	Mean Value Theorems	93
7.3	Further Results on the Riemann Integral	94
7.3.1	The Riemann-Stieltjes Integral	94
7.3.2	Riemann’s Lemma	97
7.4	Advanced Results on Integration Theory	98
7.4.1	Existence for the Riemann-Stieltjes Integral	98
7.4.2	Integration by Parts	98
7.4.3	Linearity Properties	99
7.4.4	Bounded Variation	99
8	Sequences and Series of Functions	103
8.1	Partial Sums and Pointwise Convergence	103
8.1.1	Sequences of Functions	103
8.1.2	Uniform Convergence	104
8.2	More on Uniform Convergence	106
8.2.1	Commutation of Limits	106
8.2.2	The Uniform Cauchy Condition	107
8.2.3	Limits of Derivatives	108
8.3	Series of Functions	108
8.3.1	Series and Partial Sums	108
8.3.2	Uniform Convergence of a Series	109
8.3.3	The Weierstrass M -Test	110
8.4	The Weierstrass Approximation Theorem	111
8.4.1	Weierstrass’s Main Result	112
9	Advanced Topics	115
9.1	Metric Spaces	115
9.1.1	The Concept of a Metric	115
9.1.2	Examples of Metric Spaces	115
9.1.3	Convergence in a Metric Space	116
9.1.4	The Cauchy Criterion	117
9.1.5	Completeness	117
9.1.6	Isolated Points	118
9.2	Topology in a Metric Space	120

9.2.1	Balls in a Metric Space	120
9.2.2	Accumulation Points	121
9.2.3	Compactness	122
9.3	The Baire Category Theorem	124
9.3.1	Density	124
9.3.2	Closure	124
9.3.3	Baire's Theorem	125
9.4	The Ascoli-Arzelà Theorem	126
9.4.1	Equicontinuity	126
9.4.2	Equiboundedness	127
9.4.3	The Ascoli-Arzelà Theorem	127
	Glossary of Terms from Real Variable Theory	129
	Bibliography	141
	Index	143
	About the Author	147
