

***Assessment of Student Learning in College Mathematics  
Toward Improved Programs and Courses***

**Table of Contents**

**Chapter 1. Introduction to the Volume**

**Assessment in College Mathematics: Many Options**

Bernard L. Madison

**Chapter 2. Assessing Introductory Mathematics: Partnering with Faculty  
from Other Disciplines**

William O. Martin

**Chapter 3. Success with Assessment: Responding to a System Mandate**

Philip Cheifetz, Paula Kreinbihl, Gregory Spengler, & Joan Tomaszewski

**Chapter 4. A *Crawl, Walk, Run* Approach to Assessment**

Dick Jardine

**Chapter 5. Assessment in Mathematics: A Collegial Effort**

Susan Pustejovsky

**Chapter 6. The Impact of Assessing Introductory Mathematics Courses**

Aimee J. Ellington & William E. Haver

**Chapter 7. Teaching and Assessing Quantitative Literacy**

Suzanne Mente

**Chapter 8. Assessment of the Core Mathematics Program**

Alex Heidenberg, Mike Huber, & Mike Phillips

**Chapter 9. Assessing Core Courses: Effects of Multi-Section Coordination**

Barbara M. Moskal, Scott Strong, & Graeme Fairweather

**Chapter 10. Ensuring Learning in Gateway Mathematics Through  
Assessment: Student-Centered, Cost-Effective, and Successful**

Nancy C. Marcus & Sally J. Andrade

**Chapter 11. Three Reform Initiatives: Restructuring Entry-Level Courses**

Dan Madden, Richard Thompson, & Elias Toubassi

**Chapter 12. Assessment: The Burden of a Name**

Bernard L. Madison
