Deborah and Franklin Tepper Haimo Awards for Distinguished College or University Teaching of Mathematics

Eligibility

Nominees must:
- Be college or university teachers who teach mathematical science courses at least half-time during the academic year in either the United States or Canada. Those on approved leave (sabbatical or other) during the academic year in which they are nominated qualify if they fulfilled the requirements the previous year
- Have more than seven years experience in teaching mathematical sciences
- Hold membership in the Mathematical Association of America

Guidelines for Nomination

Nominees should:
- Be widely recognized as extraordinarily successful in their teaching*
- Have teaching effectiveness that can be documented
- Have had an influence in their teaching beyond their own institution**
- Foster curiosity and generate excitement about mathematics in their students

*teaching is to be interpreted in its broadest sense, not necessarily limited to classroom teaching. It may include activities such as preparing students for mathematical competitions at the college level like the Putnam Prize Competition or the Mathematical Contest in Modeling, attracting students to major in a mathematical science or to become Ph.D. candidates, working with pre-service or in-service teachers, etc.

**influence beyond can take many forms, including demonstrating lasting impact on alumni, advancing the profession through curricular revisions in college mathematics teaching with wide-ranging impact, authoring influential publications or innovative books concerned with the teaching of college mathematics, etc.

Submission

Nominations must be submitted on the Nomination Form

Please follow the instructions on the form precisely to assure uniformity in the selection process both at the section and national levels. Nomination packets that exceeds the prescribed limits will not be considered.
