

## Final Project

Topic: Anything you like, but it must have mathematical content. Give a short history of your topic.

### Due Dates:

Proposal, three weeks before due date, in writing AND in person with me.

Project deliverable due in class week before presentations.

Presentation: during finals week.

### Details:

Deliverable: a paper, timeline, model, video, ... (may be electronic depending on project).

Reference list: minimum of two resources (four if a paper, timeline, documentary, etc.). You must have some sort of scholarly research you can reference.

~8-minute presentation: can be PowerPoint, poster, etc.

**You must get approval from me for your project!**

**It must constitute 100 points worth of work.**
