REPORT OF THE DIRECTOR

I. INTRODUCTION

I am extremely pleased to announce that this year approximately 240,000 students enrolled in the AMC 10/12 contests and a multitude of positive comments received from teachers once again confirmed that the Committee created examinations which were both exciting and challenging. Congratulations to all of you for continuing to recognize the fact the AMC 10 and 12 play a complementary role in supporting the mathematics curriculum at the high school level.

This summary includes a listing of results and awards associated with this year's AMC 10 and 12.

II. 2004 AMC 10 AND AMC 12 ENROLLMENT ANALYSIS AND STATISTICAL RESULTS

I am pleased to inform you that our outstanding AMC Lincoln office staffers were once again able to process and mail the results and awards in a timely and efficient manner. The results for schools with American Invitational Mathematics Examination qualifiers were mailed in less than two weeks following the exam, and all other results were mailed during the following week. This is rather remarkable when one considers the extensive checks which are necessary to ensure the accuracy of the results.

We continue to send an ever increasing pool of contest managers their schools' results by email. If you are able to communicate via email and wish to be added to our data base, please send a message to "hstran@amc.unl.edu" as soon as possible.

In addition to the results and awards of the AMC 10/12, this summary contains an analysis of the results of the 2003 American Mathematics Contest 8 (AMC 8) as well as the 2004 American Invitational Mathematics Examination and the 2004 USA Mathematical Olympiad.

Once again, the AMC 10 and AMC 12 was available in Braille and Large Print. These editions were administered to a total of 12 students.

III. INTERNATIONAL PARTICIPATION

I am pleased to report that the exam was administered in Puerto Rico, Guam, Virgin Islands, the Marianna Islands, to many USA embassy and military schools, and individual International schools. A list of these schools is found in this summary. Special recognition is given to the teachers abroad who provide an opportunity for students at US military bases and embassies to participate in the AMC 10/12.

The CAMC extends its appreciation to Professor Paul Charlebois who not only serves as the AMC Director for the Province of Quebec, Canada, but also translates the exams into French for students in Canada. The CAMC is also grateful to Professor Maria de Losada from Bogota, Colombia for translating the AMC 10 and AMC 12 into Spanish for use in Puerto Rico as well as in the USA and Colombia. Special thanks to Professor Peter Shiue for translating the exams into Chinese for more than 300 schools in Taiwan that participated in the AMC 10/12 this year.

IV. 2005 EXAM DATES, REGISTRATION AND FEES

There will again be **two official dates** for the AMC 10 & AMC 12. Please note that the contests are being held **two weeks earlier** in 2005.

Contest A will be held on the first Tuesday in February (February 1, 2005), Contest B will be given 15 days later, Wednesday, February 16, 2005. All rules and awards apply to both tests for all schools and students. Students will be allowed to take the exam booklets home with them the day of the test.

The Registration Fee for one contest is \$32 per school, if you register by December 15, 2004. One bundle of ten AMC 12 exams will be \$15 and one bundle of ten AMC 10 exams will be \$13. There will be an extra \$5.00 charge for the second contest (B) to cover 2-day UPS shipping. Contest B will be shipped on February 2, 2005, the day after Contest A.

Materials for Contest A will be mailed in January of 2005. Please register by December 15, 2004 if possible. Completion of your registration as early as possible will be greatly appreciated by our office staff.

If you do not receive one of our many fall mailings, a current registration form will be available on our Web site. Please post our address: <http://www.unl.edu/amc>

V. NASSP'S SANCTION

The National Association of Secondary School Principals has placed this program on the NASSP National Advisory List of Contests and Activities for 2004-2005.

VI. THE 2004 AIME

A total of 11,945 students officially participated in the 22nd American Invitational Mathematics Examination (AIME) which was held on Tuesday, March 23, 2004 or the "alternate" date, Tuesday, April 6, 2004. The comparable figure in 2003 is 13,507 students. The mean score on the AIME I was 2.246, and on the AIME II was 1.959, versus 3.06 in 2003. A list of the students with a score of at least 6 on the 2004 AIME is found in this summary.

The 2005 AIME is scheduled for Tuesday, March 8, 2005 and the alternate date is March 22, 2005. To qualify for the AIME in the year 2005 a student must score 100 or more or be in the top 5% on the AMC 12 or score 120 or more or be in the top 1% of the AMC 10 participants. The AIME consists of 15 questions with integer answers. A student's score is the number of correct answers. There is no partial credit. The time allowed is 3 hours.

VII. THE USAMO

The USA Mathematical Olympiad (USAMO) which was held on April 27-28, 2004 in each respective student's school. 261 students were invited to participate based on the selection criteria published in the AMC 10/12 and AIME Teachers' Manual. This summary contains a list of those participants as well as names of the USAMO Winners, and Honorable Mention.

The USAMO was once again administered over two days (4.5 hours each day). All papers were graded by the USAMO Committee, and by Mathematical Olympiad Summer Program staff members on April 30th and May 1st. We are grateful to these mathematicians for their excellent work associated with this important task.

The top twelve USAMO students are honored in Washington, DC in June with elaborate ceremonies held at the headquarters of the Mathematical Association of America (MAA) and the National Academy of Sciences by invitation of the Director for Science,

Report of the Director, Continued

Office of Science and Technology Policy, Executive Office of the President, Dr. John H. Marburger III. After further testing at the 2004 MOSP the top six students will be invited to serve on our 2004 International Mathematical Olympiad (IMO) team who will travel to Athens, Greece in July to compete against 83 other countries.

VIII. ACKNOWLEDGEMENT

The Committee acknowledges the contributions of many individuals and organizations for their assistance. We are indebted to the State and Canadian Provincial AMC Directors who provide assistance with the implementation of the AMC 10/12. Their tasks include contacting schools so that every student will have an opportunity to participate in the AMC contests, preparing a state/province summary of results and awards, and presenting awards. The names of the Directors are listed in this Summary.

IX. CONTRIBUTIONS OF THE LINCOLN STAFF

The contributions of the AMC Lincoln staff members to the fulfillment of the responsibilities associated with the entire exam process in a 'beyond the call of duty' manner is something to behold. Let us once again applaud Donita Bowers, Marsha Conley, Rachele Jensen, Linda McCormick, Joyce McNeil, Ruthann Royer, Sawzan Mohamed, Kay Michael and Janet Sylvester. This year we had UNL student help also: Lindsey Domangue, Tuan Le, Justin DeVries, Erin Anderson, and Tim Perrin. We are grateful to these staff members for their dedication to the AMC.

X. SPONSORS/DONORS/AMC COMMITTEE MEMBERS

We appreciate the continued support of all of our Sponsors and Contributors. Kudos go to the members of the CAMC, AMC 8, AMC 10, AMC 12, AIME, USAMO Subcommittees and Advisory Panel members who give so much of their time to the formulation of consistent rules of operation and examinations of superior quality. The leadership given by the Chairs of these committees, namely, Dr. Elgin Johnston (CAMC Director), Ms. Bonnie Leitch (AMC 8), Prof. David Wells (AMC 12), Prof. Doug Faires (AMC 10), and Mr. David Hankin (AIME) is especially noteworthy.

XI. CONTRIBUTIONS OF THE UNIVERSITY OF NEBRASKA

The operational location of the AMC has been at the University of Nebraska-Lincoln (UN-L) since 1970. The CAMC is grateful to Chancellor Harvey Perlman, President L. Dennis Smith and Prof. Jim Lewis in the UN-L Department of Mathematics, for their support.

XII. ADDITIONAL INFORMATION – INQUIRIES

MESSAGE FROM THE CAMC CHAIR

On behalf of the Mathematical Association of America's Committee on American Mathematics Competitions, I want to thank the schools and teachers who took the time to administer the 2004 American Mathematics Contest 10 (AMC 10) and the 2004 American Mathematics Contest 12 (AMC 12). This year marked the 55th year that the American Mathematics Competitions have provided high quality mathematical competitions for United States high school students and for secondary students around the globe.

Many people work hard to make these exams possible. These include the State Contest Directors who make sure schools in their regions know about the exams; the outstanding staff in Lincoln, responsible for registration, printing, distributing, and scoring the exams, and communicating results; and the members of the AMC 10/12 Committee and AMC Advisory Panel who spend long hours composing problems, writing and rewriting problem statements and solutions, and monitoring the difficulty level of the exam. Special thanks are due Douglas Faires, the AMC 10 Chair, and David Wells the AMC 12 Chair, who coordinate the exam creation efforts. I also want to thank the students for giving up part of their day to participate in the AMC 10 or the AMC 12.

Many of the AMC 10 and AMC 12 participants did well enough to qualify for the American Invitational Mathematics Examination (AIME) and a small number of AIME students then qualified for the United States of America Mathematical Olympiad (USAMO). Although these exams are given to fewer students than participate in the AMC 10/12, the committees that create these exams work just as hard as the AMC 10/12 Committees. Thanks to David Hankin, the AIME Chair, and Titu Andreescu, the USAMO Chair, for their long efforts in coordinating the creation of high quality exams.

The mission of the CAMC is to promote interest in mathematics among K-12 students and to identify mathematically talented students through a series of mathematical exams. Thus, although the exams are designed to expose students to important mathematical ideas and give students a valuable problem solving experience, it is even more important that students find the exams challenging and fun. We hope that students enjoy not only taking the exam, but also preparing for the exam with teachers and other students, and discussing the answers and different solutions afterwards. But the exams serve another purpose as well. Many of the AMC brochures and posters display the question "Can you think outside the box?" The reason for studying mathematics in school is not just to learn how to do the problems in a textbook. A second purpose is to learn techniques and gain the confidence to tackle new or unfamiliar problems. Many of our exam questions are designed to give students a chance to try their hand at problems that require them to apply their classroom knowledge in new situations and in different ways.

And although students may not always succeed in such situations, they can grow mathematically by trying to solve such problems, and from follow up discussions after the exam.

We are always interested in ideas to help us better carry out our mission. The mathematics teachers in the schools are one of our most valued sources of ideas. We welcome any ideas you have that will help us to improve the AMC 10 and AMC 12 and help us to reach more students. In addition, we have a great need for high school teachers on the AMC Advisory Panel. If you are interested in contributing to our contests please contact me at the address given below, or visit the American Mathematics Competitions booth at next year's NCTM meeting in Anaheim.

MESSAGE FROM THE AMC 10 CHAIR

The AMC 10 test was developed to provide a better experience in mathematical problem solving for students in the lower high school grades. In years prior to 2000, students in these grades had to take a test that included problems on topics such as logarithms and trigonometry, subjects that they had not yet studied. The AMC 10 examination contains only problems based on subject material that students in ninth and tenth grade have likely seen, while still providing them with a challenging experience.

Our goal for the AMC 10 has been to design the contests so that the average student can work on between 15 and 20 problems and get at least 10 of those correct. This would give an average score of between 72.5 and 85, since a student receives 6 points for each correct problem and 2.5 points for each unanswered problem. Our average score on the A contest this year was 74.4 and on the B contest it was 79.6, so we feel that we are meeting our goal. Although the scores on the B contest have generally been higher than those on the A contest, we think that the students taking the B contest are better prepared than those taking the A, and that the B average is biased because students who missed the AIME qualifying score are likely to take the B contest in addition to the A contest.

The AMC10 and AMC12 tests have common problems, which has the advantage of permitting students taking the AMC 10 to compare their solutions with the students taking the AMC 12, and allows teachers to better identify excellent problem solvers at a young age. However, we are concerned that if we predictably have a large number of common problems on the exams, it might encourage younger students to take the AMC 12 before they are ready, since a larger proportion of students taking the AMC12 qualify for the American Invitational Mathematics Examination (AIME). As a consequence, you will likely see an unpredictable fluctuation in the number of common problems from a minimum of about nine to a maximum of about thirteen.

A new policy for AIME qualifying was introduced beginning with the 2000 AMC examinations. Those students taking the AMC 12 and scoring over 100 qualify, as usual, as do those students scoring in the top 5% on the AMC 12 examination. This new policy is more equitable since it guards against the possibility of a particularly difficult examination, one on which the scores are uniformly lower than normal, skewing the number of AIME qualifiers.

For the 2004 contest we have instituted a similar qualifying system for the students taking the AMC 10 contests. Students scoring in the top 1% of either AMC10 qualify for the AIME, as well as all those who score 120 or more on one of these contests. The requirement is set higher for AMC 10 qualifiers for two reasons:

- First, the AIME can be quite intimidating, and we do not want young students to be discouraged by poor performance on this examination.
- Second, we would like to ensure that any student qualifying for the AIME by virtue of placement on the AMC 10 would likely also qualify for the AIME in subsequent years when taking the AMC 12.

It could be very disappointing for a student to be an AIME qualifier in grade 10 but not in subsequent high school years. By restricting the number of AIME qualifiers from the AMC 10 to about the top 1%, we hope not to exclude any very good young students for whom the AIME would be an appropriate experience, but also not put students in a situation where they do not have much opportunity to succeed.

Message from the AMC 10 Chair, Continued

We are often asked which of the AMC examinations a good student in grade 9 or grade 10 should take. The answer probably depends as much on the personality of the student as on the student's mathematical ability and training. Some students can take a very difficult examination, not score as well as they expect, and take the experience as incentive for future study. The same experience for another student might be devastating and lead to a decreased interest in mathematical problem solving, and perhaps even in the study of mathematics. The latter situation should, of course, be avoided at all cost. Personally, I would prefer to err on the side of caution. When advising students regarding the choice of contests, please keep in mind that the primary goal of all the American Mathematics Competitions contests is to provide students with a positive experience in mathematical problem solving. The awards that can sometimes accompany this experience are nice, but distinctly secondary.

We will continue to try to improve the experience of students taking the AMC, but the way in which we will do so depends significantly on the feedback that we receive from teachers giving the examinations and from students taking them. If you are interested in some of the details of the categories of problems selections for the AMC 10 and 12 in the past two years, you might like to take a look at some notes that I prepared for a talk at the NCTM meeting in San Antonio in April of 2003. MESSAGE FROM THE AMC 12 CHAIR

Two complementary goals of the AMC 12 are to provide a positive mathematical experience for all contestants and to identify those students who are sufficiently talented to benefit from participation in the AIME. To achieve those goals in a manner that is equitable to all participants is a daunting task that I share with the contest committee, a dedicated panel of problem posers and reviewers, and the staff at the AMC office. In creating two versions of the contest each year we face a multitude of difficulties, which we overcome with varying degrees of success.

It is important for the first ten problems on each contest to be accessible to nearly every student and for the last five problems to be challenging enough to distinguish among the very best students. Of the first ten problems on the 2004 AMC 12, the average 12A contestant answered 5.55 correctly and the average 12B contestant answered 6.77 correctly. The corresponding numbers for 2003 were 5.35 and 5.61, indicating that we succeeded in making the initial problems accessible to more students in 2004.

It is also important that the standards for AIME qualification should be consistent from year to year. The overall percentage of AIME qualifiers among AMC 12 contestants was 10.7%, a slight decrease from 11.6% in 2003. However, this year's total represents 8.1% of all 12A contestants and 19.3% of all 12B contestants. Because of possible differences in the aggregate characteristics of students taking the two forms of the contest, it is difficult to interpret differences in aggregate scores. However, the evidence seems to suggest that we inadvertently made the 12B contest easier than the 12A. Such discrepancies will occur sometimes in spite of our best efforts. One way in which we attempt to minimize any negative impact on students is to guarantee an invitation to the AIME for the top 5% of scorers on each contest as well as to all students who score at least 100.

We continue to attempt to define the role of calculators on the AMC 12 contests. Our dilemma can be seen by considering three of our objectives related to calculator use. First, contestants should be able to use any technology from a TI-89 down to a four-function calculator or none at all. Second, students with sophisticated calculators should not have a significant advantage over other students. Third, students should be able to use their calculators in a meaningful way to solve contest problems. A moment's reflection reveals that it is impossible to achieve all three objectives simultaneously, and our current policy commits us to the first two. The consequence is that contestants cannot make meaningful use of their calculators. As a strong proponent of graphing calculator use in the classroom, I am troubled that our contests may be sending a counterproductive message to students about the role of technology in mathematics. If you can devise examples of appropriate calculator-friendly problems that are equally accessible to students without calculators, please send them to me at the address below.

In the spirit of a good problem solver, I view the difficulties mentioned here not as disagreeable burdens, but as challenges to be met with creative thinking. As Doug Faires and I prepare to set our respective 2005 contests into their final form and begin work on the 2006 contests, I am reminded of yet another challenge we face. In order to maintain the quality of our contest problems, we need a large pool of problems to choose from each year. If you or anyone you know would like to help create the contests, please contact CAMC Chair Elgin Johnston (ehjohnst@iastate.edu).

I would welcome your comments on anything I have said here or on any aspect of the AMC 12 contests. I can be reached at dmw8@psu.edu or at 724-334-6749 (office) or 412-486-9478 (home).

QUOTATIONS

Alaska:

Once again it was a pleasure to participate in the contest. My students looked forward to it.

Arizona:

Whenever I call Nebraska with a question, I am always treated with courtesy and receive a prompt answer.

California:

I love this contest. I participated as a student, and now I enjoy giving it as a teacher. The challenge is worth the price of admission. It humbles me on a yearly basis.

Colorado:

We will continue to register as long as I teach.

We will definitely register every year. It is nice to be able to give students who are good at math an opportunity to compete and challenge themselves.

This is a great competition for students. It is challenging and problem-solving based. It helps us identify mathematical talent not always obvious on rote memory tests. Thank you.

District Columbia:

All students worked for almost the entire time, the sign of well designed examination. Thank you.

Florida:

The AMC is a wonderful contest for my Alpha Theta members. They enjoy the challenging questions and the recognitions if they score well.

My students enjoy being challenged with “out-of-the-box” thinking. We will continue to register.

We have been very pleased with the changes you have instituted in the past 2 years. Our school has participated since at least 1987 and most of our instructors took the AHSME in high school.

Hawaii:

We will continue to give this test. We like giving our students a chance to attempt a different kind of challenging problem. I like to discover our students with “star-power”.

Iowa:

Directions are very clear and easy to follow. Thank you.

Keep up the good work. I really like the parent letter and practice questions.

Indiana:

Thank you for all your efforts and your attention to keeping the costs minimal.

Massachusetts:

I appreciate the organization, clear instructions, and conscious support provided in this test.

Quotations, Continued

Minnesota:

Good contest; excellent opportunity for students to challenge themselves in mathematics. Wonderful recognition for students who may not otherwise be recognized for any other achievements.

We will continue to participate in the future. The contest is a great experience for our students. I specially like the AMC 10 opportunity for our younger students.

Missouri:

You do a great job already getting information out so early. Thanks for the added practice questions in the instruction manual.

This is the first time our school has participated in the AMC 12 It was a good experience for both my students and me. We hope to take part of it again next year.

Michigan:

Thanks again! I am glad you guys are there to organize this competition.

This is my first year as contest manager. Your staff has been great to work with.

Montana:

I feel that this contest is very good. My students enjoy competing in it. The kids pay the expenses out of their own pocket.

North Dakota:

Professionally done. Well organized and prompt with result. Thanks for invitation!!

Nebraska:

We appreciate this opportunity to recognize our gifted students. Thank you for including the certificates in the teacher manual. We give 1st, 2nd, and 3rd place in our school.

New Jersey:

My students look forward to this test. Talk for a long time after about the questions, and eagerly await the results. I appreciate the professional way all aspects are implemented.

Public education is taking a hit all across the nation.

New York:

The inclusion this year of posters, career pamphlets and actuarial information was a great improvement and motivator.

Ohio:

This is about the 30th year I have been involved in administering these tests. I appreciate the separation of the 10 & 12 contests.

We will continue, simply because we realizes the importance of this contest and the need for the students to challenge themselves.

Oregon:

Wonderful opportunity! I like the new addition.

Pennsylvania:

Quotations, Continued

Very convenient format and easy to administer.

Good opportunity for students to work on problems that they do not normally see in class.

We appreciate the opportunity to compete and measure our strength and areas for growth against other schools nationwide.

Texas:

This was my first year coordinating the AMC; I found the service excellent. Testing materials arrived on time despite the tardiness of our registration. Thank you.

This seems like a good occasion to thank you for the entire AMC program . . . The mathematical challenges the AMC exams have given the students in my program over the years have been invaluable, not just to the students . . . who win awards, but also the students whose names you will never hear. All of the kids enjoy taking the exams and following their progress from year to year, as well as comparing their performance to a national standard.

Utah:

It is very helpful to aid us in choosing our outstanding thinkers for math contests on a state level. We will continue to register.

Virginia:

I like the large poster you sent. It helps in communicating with the students, especially those taking math course outside the school setting.

I think it is a very prestigious event and the students benefit a great deal. Thank you.

New Brunswick, Canada:

It is good to spend a little time working outside the curriculum. It is also a great way to provide enrichment for kids that do really well. We will register again and again.

Ontario, Canada:

Having the 2 contest dates is ideal for us – one has always worked with our school calendar.

And, a final note from a student . . .

Math has been a prominent and enriching experience in my high school career, whether I'm studying in the classroom, competing in the AMC, or browsing the Art of Problem solving forums.

I'd like to thank you . . . for sponsoring the AMC. I've found the challenge of the AMC has encouraged my academic growth.

I'm a senior this year, so this was my last chance at the AMC; in retrospect, I'm proud of how I've developed throughout high school. However, I'll be attending Caltech next year, so I'm sure my mathematical career is not over. And I'm sure your gift will not only intrigue me as the AMC had, but also allow me to delve deeper into the

EDYTH MAY SLIFFE AWARDS FOR DISTINGUISHED HIGH SCHOOL MATHEMATICS TEACHING

The sixteenth set of winners of the Edyth May Sliffe Awards for Distinguished High School Mathematics Teaching was announced following the analysis of the 2004 American Mathematics Contest 12 (AMC 12). They are listed on the next page.

These awards are the result of a bequest made to the Mathematical Association of America (MAA) by Edyth May Sliffe, a retired high school teacher of mathematics at Emeryville, California. She made this bequest for the purpose of giving awards to high school mathematics teachers whose teams have done well on the AMC 12. Edyth Sliffe wanted to do this because her students had always done very well on the AMC 12 and received various honors, but she as a teacher had never received any recognition. She had always felt that such teachers should receive some awards.

The award recipients were selected from nominations received from the top three students of each of the 60 highest scoring teams on the AMC 12. These students were asked to recommend a teacher who in their opinion was most responsible for their success on the AMC 12.

In addition to a cash prize, the award winning teachers receive: a letter of congratulations from the President of the MAA; a certificate signed by the President of the MAA, the Chair of the Committee on the AMC 12, and the Director of the American Mathematics Competitions; a Sliffe pin; and a free one-year MAA membership. Whenever possible these awards are presented to the winners during an award ceremony arranged by their school administrators.

This Award serves as an excellent illustration of how a single person, in this case, Edyth May Sliffe, can have a substantial positive influence nationwide by taking a decisive action to further a cause he or she strongly believes.

AMERICAN MATHEMATICS COMPETITION 8

The nineteenth Annual American Mathematics Contest 8 (AMC 8) was held on Tuesday, November 18, 2003, and it continued to be received with enthusiasm and support by an overwhelming number of schools, administrators, teachers and students. A total of 183,830 students from 2,396 schools registered for the examination.

Since the AMC 8 was centrally scored at the Office of the Director it was possible to obtain an enormous amount of data. The following represents some of the statistics relating to the examination:

Number of Answer Forms received -	158,309
Number of schools sending in reports -	2,737
Number of students scoring 25 (a perfect paper) -	192
National student average -	10.27
Number of recorded female participants -	75,574
Number of recorded male participants -	80,010
Average of recorded female participants -	9.72
Average of recorded male participants -	10.79

Grade level average:

Grade	Number recorded	Average
≤5	1,553	7.62
6	15,414	8.58
7	53,170	9.77
8	86,542	10.93

Please note that the word “recorded” used above should be interpreted as indicating that the results are based on only the items that were marked by the students. Some of the students failed to mark all items such as their grade and sex.

The AMC 8 will continue to be a 25-question, 40-minute multiple choice exam that may be given during a regular mathematics class period. The Committee on the American Mathematics Competitions has approved the use of calculators on the 2004 AMC 8. The nature of the questions will not change from past tests. No problems on the test will require the use of a calculator, but students may have one available to use if they wish. High scoring students on the 2004 AMC 8 will be invited to participate in the 2005 AMC 10A & B and/or AMC 12A & B which are scheduled for TUESDAY, February 1, 2005 and/or February 16, 2005.

Information regarding the implementation of the AMC 8 may be obtained from the American Mathematics Competitions at 800-527-3690 or on the AMC web site at: <http://www.unl.edu/amc>.

SCHOOL AWARDS DESCRIPTION

SCHOOL COMMITTEE AND DONOR NATIONAL AWARDS

In each of the eleven regions into which the United States and Canada are divided, the five schools with the highest team scores (sum of the highest three scores by participants) are recognized by Donor or Committee Awards.

- A. **Charles T. Salkind Memorial Silver Cup** — This silver cup, donated by the L.G. Balfour Company, Attleboro, MA, is awarded to the school with the highest team score (in any region).
- B. **William H. Fagerstrom Memorial Silver Cup** — This silver cup is awarded to the school with the second highest team score (in any region) and it is provided by the L.G. Balfour Company, Attleboro, MA..
- C. **Committee Bronze Cups** — In each of the regions in which a silver cup is not awarded the Committee on the American Mathematics Competitions provides a Bronze Cup to the school with the highest team score.

SCHOOLS NOT RECEIVING A CUP ARE ELIGIBLE FOR THESE AWARDS

- D. **CAMC Mathematics Books*** — In each of the eleven regions, five books are donated by the Committee on the American Mathematics Competitions to one school having a high team score.
- E. **W. H. Freeman Books*** — In each of the eleven regions, a set of books, donated by W.H. Freeman and Company, San Francisco, CA is awarded to one school having a high team score.
- F. **Mathematics Magazine*** — In each of the eleven regions, a one-year subscription is donated by the Committee on the American Mathematics Competitions to one or more schools having a high team score.
- G. **Pedagoguery Award** -- Awarded to one school in each of the 50 states, US Territories, Military Schools abroad, and Canada with the “Most Improved” Team Score on the AMC 10, and AMC 12.

INTRAMURAL AWARDS

- 1. **Certificate of Honor** — This is awarded to schools with a team score of 400 or greater.
- 2. **Certificate of Merit** — This is awarded to schools with a team score of at least 300.

* Distribution of awards is arranged so that schools do not receive duplicates of awards made to them in prior years.

**AIME - AMERICAN INVITATIONAL MATHEMATICS
EXAMINATION
MESSAGE FROM THE AIME CHAIR**

Congratulations to those who qualified to participate in the AIME.

One of the purposes of the AIME is to aid in the selection process for qualification for the USAMO. However, those of us who work on constructing the AIME believe that it has additional purposes which are at least as important as USAMO selection. It is our hope that the AIME provides an interesting, enjoyable, challenging, motivational and educational experience for all those who take it.

To provide a proper transition between the AMC and The USAMO, the difficulty of the problems must encompass a broad range. It is our goal to include problems of sufficient difficulty so that even the top few high school problem solvers will consider it a worthy challenge to get a score as high as 14 or 15. At the same time, we include several problems whose difficulty is equivalent to some of those in the middle of the AMC 12, so that all qualifiers have a reasonable chance to correctly answer at least a few problems.

As is the case with many problems in mathematics, most of the problems can be solved in several different ways. Those students who focus their efforts on the first five problems should note that often these problems will succumb to a grind-it-out approach. These students will be rewarded when they take the time to read the solution manual to find that each of these problems has an elegant solution as well.

In fact, the solution booklet will prove rewarding for all contestants. We try to include alternate approaches, elegant shortcuts, and glimpses into areas of mathematics that our readers may then be motivated to explore.

It is our hope and belief that the number of high school students around the nation who have become aware of the pleasures of solving challenging math problems is growing. It is our wish that they and their teachers find the AIME a source of well constructed and worthwhile problems and a means of improving their problem solving skills. To continue to improve, students should attempt problems that are at the limit of their mathematical abilities. Decide if such problems are at the beginning, the middle or the end of the AIME, or perhaps on the USAMO, and work on those.

A debt of gratitude is owed to the panelists who contribute problems and suggestions to make the AIME as good as it is. Particular thanks must be given to the members of the AIME Committee, a group whose current members are Sam Baethge, Jacek Fabrykowski., Chris Jeuell, John Lawlor and Susan Wildstrom. It is they who deserve the credit for the AIME's quality. Thank you too to the staff in Lincoln who make all of the AMC Contests and events possible.

Happy solving.

U.S.A. MATHEMATICAL OLYMPIAD

QUALIFIERS FOR 2004

The Thirty-third U. S. A. Mathematical Olympiad (USAMO) was held April 27 and 28, 2004. A total of 262 AIME participants from 164 schools were invited to take the examination on the basis of the criteria indicated in the AMC 10/12 Teachers' Manual. See also the Report of the Director in this Summary.

2003 INTERNATIONAL MATHEMATICAL OLYMPIAD

The 2003 United States Olympic team

Aaron Pixton, Yan Zhang, Po Ruh Loh, Daniel Kane, Mark Lipson, and Anders Kaseorg.

The 2003 International Mathematical Olympiad (IMO), held in Tokyo, Japan, July 7-20, 2003, attracted 457 of the best young mathematicians from 82 +2 (observer) countries. The IMO is the world's preeminent mathematical competition for high school-age students. The participating students won a total of 37 gold medals, 69 silver, and 104 bronze medals for solving, in a grueling nine-hour test administered over July 13 and July 14, six math questions that would daunt even some professional mathematicians. Final results of the IMO are available on the web at <http://www.imo2003.com>.

The American Mathematics Competitions, www.unl.edu/amc, a program of The Mathematical Association of America, is a series of challenging tests which culminate in the selection of the USA IMO team. Other major sponsors of the AMC and the USA-IMO team are (<http://www.akamai.com>) and the University of Nebraska. The IMO team is chosen through a three-stage process of mathematics testing starting with almost half a million test-takers in middle school and high school.

The third place USA team ranked behind the first place team from China and the second ranked Russian team. Overall, the six members of the USA team won four gold medals, and two silver medals.

Daniel Kane of Madison, WI, Anders Kaseorg of Charlotte, NC, Po Ruh Loh of Madison, WI, and Aaron Pixton of Vestal, NY all received gold medals. Mark Lipson of Lexington, MA and Yan Zhang of Alexandria, VA received silver medals.
