# REPORT OF THE DIRECTOR STEVEN DUNBAR

## I. INTRODUCTION

I am extremely pleased to announce that this year approximately 230,000 students enrolled in the AMC 10/12 contests and a multitude of positive comments received from teachers once again confirmed that the Committee created examinations which were both exciting and challenging. Congratulations to all of you for continuing to recognize the fact the AMC 10 and 12 play a complementary role in supporting the mathematics curriculum at the high school level. This summary includes a listing of results and awards associated with this year's AMC 10 and 12.

## II. 2005 AMC 10 AND AMC 12 ENROLLMENT ANALYSIS AND STATISTICAL RESULTS

Our outstanding AMC Lincoln office staffers were once again able to process and mail the results and awards in a timely and efficient manner. The results for schools with American Invitational Mathematics Examination qualifiers were mailed in less than two weeks following the exam, and all other results were mailed during the following week. This is rather remarkable when one considers the extensive checks which are necessary to ensure the accuracy of the results.

We continue to send an ever increasing pool of contest managers their schools' results by email. If you are able to communicate via email and wish to be added to our data base, please send a message to "[hstran@amc.unl.edu](mailto:hstran@amc.unl.edu)" as soon as possible.

In addition to the results and awards of the AMC 10/12, this summary contains an analysis of the results of the 2004 American Mathematics Contest 8 (AMC 8) as well as the 2005 American Invitational Mathematics Examination and the 2005 USA Mathematical Olympiad.

Once again, the AMC 10 and AMC 12 was available in French, Spanish, Braille and Large Print.

## III. INTERNATIONAL PARTICIPATION

I am pleased to report that the exam was administered in Puerto Rico, Guam, Virgin Islands, the Marianna Islands, to many USA embassy and military schools, and individual International schools. A list of these schools is found in this summary. Special recognition is given to the teachers abroad who provide an opportunity for students at US military bases and embassies to participate in the AMC 10/12.

The CAMC extends its appreciation to Professor Paul Charlebois who translates the exams into French for students in Canada. We are also grateful to Professor Maria de Losada and Mario Cruz from Bogota, Colombia for translating the AMC 10 and AMC 12 into Spanish for use in Puerto Rico as well as in the USA and Colombia. Special thanks to Professor Peter Shiue for translating the exams into Chinese for more than 300 schools in Taiwan that participated in the AMC 10/12 this year.

## IV. 2006 CONTEST DATES, REGISTRATION AND FEES

There will again be **two official dates** for the AMC 10 & AMC 12. Please note that the contests are being held **during the same two weeks** as in 2005.

**Contest A will be held on the last Tuesday in January (January 31, 2006), Contest B will be given 15 days later, Wednesday, February 15, 2006** All rules and awards

## Report of the Director, Continued

apply to both tests for all schools and students. Students will be allowed to take the exam booklets home with them the day of the test.

The Registration cost for the 2005-2006 year will be the same as for the 2004-2005 season, however we have simplified the form for U. S. Schools. We have included the shipping cost in with the Registration Fee. For example, registration plus shipping for one AMC A Contest is \$39 per school, if you register by December 15, 2005. One bundle of ten AMC 12 exams will be \$15 and one bundle of ten AMC 10 exams will be \$13. There will be an extra \$10.00 charge included with the Registration for the second contest (B) to cover 2-day shipping. Contest B will be shipped on February 1, 2006, the day after Contest A.

Materials for Contest A will be mailed in January of 2006. Please register by December 15, 2005 if possible. Completion of your registration as early as possible will be greatly appreciated by our office staff.

If you do not receive one of our many fall mailings, a current registration form will be available on our Web site. Please post our address: <http://www.unl.edu/amc>

### V. NASSP'S SANCTION

The National Association of Secondary School Principals has placed this program on the NASSP National Advisory List of Contests and Activities for 2005-2006.

### VI. THE 2005 AIME

A total of 12,476 students officially participated in the 23<sup>rd</sup> American Invitational Mathematics Examination (AIME) which was held on Tuesday, March 8, 2005 or the "alternate" date, Tuesday, March 22, 2005. The comparable figure in 2004 is 11,945 students. The mean score on the AIME I was 2.75, and on the AIME II was 2.43, versus the 2.246 on the AIME I, and 1.959 on the AIME II, in 2004. A list of the students with a score of at least 6 on the 2005 AIME is found in this summary.

**The 2006 AIME is scheduled for Tuesday, March 7, 2006 and the alternate date is Wednesday, March 22, 2006. Please note that the AIME II has been changed from a Tuesday to a Wednesday, to provide more flexibility in scheduling.** To qualify for the AIME in the year 2006 a student must score 100 or more or be in the top 5% on the AMC 12 or score 120 or more or be in the top 1% of the AMC 10 participants. The AIME consists of 15 questions with integer answers. A student's score is the number of correct answers. There is no partial credit. The time allowed is 3 hours.

### VII. THE USAMO

The USA Mathematical Olympiad (USAMO) was held on April 19-20, 2005 in each respective student's school. 260 students were invited to participate based on the selection criteria published in the AMC 10/12 and AIME Teachers' Manual. This summary contains a list of those participants as well as names of the USAMO Winners, and Honorable Mention.

The USAMO was once again administered over two days (4.5 hours each day). All papers were graded by the USAMO Committee, and by Mathematical Olympiad Summer Program staff members on April 22<sup>nd</sup>, 23<sup>rd</sup> and 24<sup>th</sup>. We are grateful to these mathematicians for their excellent work associated with this important task.

The top twelve USAMO students are to be honored in Washington, DC June 26<sup>th</sup> and 27<sup>th</sup>, 2005 with elaborate ceremonies held at the headquarters of the Mathematical Association of America (MAA) and the National Academy of Sciences by invitation of the Director for Science, Office of Science and Technology Policy, Executive Office of the President, Dr. Ralph Cicerone. After further testing at the 2005 MOSP the top six students will be invited to serve on our 2005 International Mathematical Olympiad (IMO) team who will travel to Merida, Mexico in July to compete against 83 other countries.

## Report of the Director, Continued

### VIII. ACKNOWLEDGEMENT

The Committee acknowledges the contributions of many individuals and organizations for their assistance. We are indebted to the State and Canadian Provincial AMC Directors who provide assistance with the implementation of the AMC 10/12. Their tasks include contacting schools so that every student will have an opportunity to participate in the AMC contests, preparing a state/province summary of results and awards, and presenting awards. The names of the Directors are listed in this Summary.

### IX. CONTRIBUTIONS OF THE LINCOLN STAFF

The contributions of the AMC Lincoln staff members to the fulfillment of the responsibilities associated with the entire exam process in a 'beyond the call of duty' manner is something to behold. Let us once again applaud Donita Bowers, Marsha Conley, Rachelle Jensen, Linda McCormick, Joyce McNeil, Ruthann Royer, Sawsan Mohamed, Kay Michael and Janet Sylvester. This year we had UNL student help also: Lindsey Domangue, Tuan Le, Justin DeVries, Nicole Paasch, Gabe Smith, and Casy Fahrnbruch. We are grateful to these staff members for their dedication to the AMC.

### X. SPONSORS / CONTRIBUTORS / AMC COMMITTEE MEMBERS

We appreciate the continued support of all of our Sponsors and Contributors. Kudos go to the members of the CAMC, AMC 8, AMC 10, AMC 12, AIME, USAMO Subcommittees and Advisory Panel members who give so much of their time to the formulation of consistent rules of operation and examinations of superior quality. The leadership given by the Chairs of these committees, namely, Dr. Elgin Johnston (CAMC Chair), Ms. Bonnie Leitch (AMC 8), Prof. David Wells (AMC 12), Prof. Doug Faires (AMC 10), and Mr. David Hankin (AIME) is especially noteworthy.

### XI. CONTRIBUTIONS OF THE UNIVERSITY OF NEBRASKA

The operational location of the AMC has been at the University of Nebraska-Lincoln (UN-L) since 1970. The CAMC is grateful to Chancellor Harvey Perlman, Dean Richard Hoffman, and Prof. John Meakin in the UN-L Department of Mathematics, for their support.

### XII. ADDITIONAL INFORMATION – INQUIRIES

Information regarding this summary, AMC publications and the implementation of the AMC 8, AMC 10, AMC 12, AIME and USAMO may be obtained via email (amcinfo@unl.edu), the AMC Web Page (<http://www.unl.edu/amc>), by telephone (800-527-3690) or by writing to the AMC Lincoln office at:

## MESSAGE FROM THE CAMC CHAIR

On behalf of the Mathematical Association of America's Committee on American Mathematics Competitions, I want to thank the schools and teachers who took the time to administer the 2005 American Mathematics Contest 10 (AMC 10) and the 2005 American Mathematics Contest 12 (AMC 12). This year marked the 56th year that the American Mathematics Competitions have provided high quality mathematical competitions for United States high school students and for secondary students around the globe.

Many people work hard to make these exams possible. These include the State Contest Directors who make sure schools in their regions know about the exams; the outstanding staff in Lincoln, responsible for registration, printing, distributing, and scoring the exams, and communicating results; and the members of the AMC 10/12 Committee and AMC Advisory Panel who spend long hours composing problems, writing and rewriting problem statements and solutions, and monitoring the difficulty level of the exam. Special thanks are due Douglas Faïres, the AMC 10 Chair, and David Wells the AMC 12 Chair, who coordinate the exam creation efforts. I also want to thank the students for giving up part of their day to participate in the AMC 10 or the AMC 12.

Many of the AMC 10 and AMC 12 participants did well enough to qualify for the American Invitational Mathematics Examination (AIME) and a small number of AIME students then qualified for the United States of America Mathematical Olympiad (USAMO). Although these exams are given to fewer students than participate in the AMC 10/12, the committees that create these exams work just as hard as the AMC 10/12 Committees. Thanks to David Hankin, the AIME Chair, and Cecil Rosseau, the USAMO Chair, for their efforts in coordinating the creation of high quality exams.

The mission of the CAMC is to promote interest in mathematics among K-12 students and to identify mathematically talented students through a series of mathematical exams. Thus, although the exams are designed to expose students to important mathematical ideas and give students a valuable problem solving experience, it is even more important that students find the exams challenging and fun. We hope that students enjoy not only taking the exams, but also preparing for the exams with teachers and other students, and discussing the answers and different solutions afterwards. But the exams serve another purpose as well. Many of the AMC brochures and posters display the question "Can you think outside the box?" The reason for studying mathematics in school is not just to learn how to do the problems in a textbook. A second purpose is to learn techniques and gain the confidence to tackle new or unfamiliar problems. Many of our exam questions are designed to give students a chance to try their hand at problems that require them to apply their classroom knowledge in new situations and in different ways. And although students may not always succeed in such situations, they can grow mathematically by trying to solve such problems, and from follow up discussions after the exam.

We are always interested in ideas to help us better carry out our mission. The mathematics teachers in the schools are one of our most valued sources of ideas. We welcome any ideas you have that will help us to improve the AMC 10 and AMC 12 and help us to reach more students. In addition, we have a great need for high school teachers on the AMC Advisory Panel. If you are interested in contributing to our contests please contact me [ehjohnst@iastate.edu](mailto:ehjohnst@iastate.edu), or visit the American Mathematics Competitions booth at next year's NCTM meeting in St. Louis.

## MESSAGE FROM THE AMC 10 CHAIR

The AMC 10 test was developed to provide a better experience in mathematical problem solving for students in the lower high school grades. In years prior to 2000, students in these grades had to take a test that included problems on topics such as logarithms and trigonometry, subjects that they had not yet studied. The AMC 10 examination contains only problems based on subject material that students in ninth and tenth grade have likely seen, while still providing them with a challenging experience.

Our goal for the AMC 10 has been to design the contests so that the average student can work on between 15 and 20 problems and get at least 10 of those correct. This would give an average score of between 72.5 and 85, since a student receives 6 points for each correct problem and 2.5 points for each unanswered problem. The average score on the A contest this year was lower than last year (at 69.1 vs 74.4), but higher on the B contest (at 80.4 vs 79.6). Even though this year's A contest score was lower than the previous year, the trend since the inception of the AMC 10 has been generally upward, so we feel that we are meeting our goal. The scores on the B contest have generally been higher than those on the A contest. We think that this is due to the fact that the students taking the B contest are better prepared than those taking the A. In addition, the average score on the B contest is likely biased upward because students who missed the American Invitational Mathematics Examination (AIME) qualifying score on the A contest have been permitted to take the B contest in an attempt to improve their score.

The AMC10 and AMC12 tests have common problems, which has the advantage of permitting students taking the AMC 10 to compare their solutions with the students taking the AMC 12, and allows teachers to better identify excellent problem solvers at a young age. However, we are concerned that if we predictably have a large number of common problems on the exams, it might encourage younger students to take the AMC 12 before they are ready, since a larger proportion of students taking the AMC12 qualify for the AIME. As a consequence, you will likely see an unpredictable fluctuation in the number of common problems from a minimum of about nine to a maximum of about thirteen.

A new policy for AIME qualifying was introduced beginning with the 2000 AMC examinations. Those students taking the AMC 12 and scoring over 100 qualify, as usual, as do those students scoring in the top 5% on the AMC 12 examination. This new policy is more equitable since it guards against the possibility of a particularly difficult examination, one on which the scores are uniformly lower than normal, skewing the number of AIME qualifiers.

For the 2004 contest we instituted a similar qualifying system for the students taking the AMC 10 contests. Students scoring in the top 1% of either AMC 10 qualify for the AIME, as well as all those who score 120 or more on one of these contests. The requirement is set higher for AMC 10 qualifiers for two reasons:

- First, the AIME can be quite intimidating, and we do not want young students to be discouraged by poor performance on this examination.
- Second, we would like to ensure that any student qualifying for the AIME by virtue of placement on the AMC 10 would likely also qualify for the AIME in subsequent years when taking the AMC 12.

It could be very disappointing for a student to be an AIME qualifier in grade 10 but not in subsequent high school years. By restricting the number of AIME qualifiers from the AMC 10 to about the top 1%, we hope not to exclude any very good young students for whom the AIME would be an appropriate experience, but also not put students in a situation where they do not have much opportunity to succeed.

## Message from the AMC 10 Chair, Continued

We are often asked which of the AMC examinations a good student in grade 9 or grade 10 should take. The answer probably depends as much on the personality of the student as on the student's mathematical ability and training. Some students can take a very difficult examination, not score as well as they expect, and take the experience as incentive for future study. The same experience for another student might be devastating and lead to a decreased interest in mathematical problem solving, and perhaps even in the study of mathematics. The latter situation should, of course, be avoided at all cost. Personally, I would prefer to err on the side of caution. When advising students regarding the choice of contests, please keep in mind that the primary goal of all the American Mathematics Competitions contests is to provide students with a positive experience in mathematical problem solving. The awards that can sometimes accompany this experience are nice, but distinctly secondary.

We will continue to try to improve the experience of students taking the AMC, but the way in which we will do so depends significantly on the feedback that we receive from teachers giving the examinations and from students taking them.

Please send me ([fares@math.ysu.edu](mailto:fares@math.ysu.edu)) or Elgin Johnston, the AMC Chair ([ehjohnst@iastate.edu](mailto:ehjohnst@iastate.edu)) any comments you have with regard to the AMC 10 examination.

## MESSAGE FROM THE AMC 12 CHAIR

Two complementary goals of the AMC 12 are to provide a positive mathematical experience for all contestants and to identify those students who are sufficiently talented to benefit from participation in the AIME. To achieve those goals in a manner that is equitable to all participants is a daunting task that I share with the contest committee, a dedicated panel of problem posers and reviewers, and the staff at the AMC office. In creating two versions of the contest each year we face a multitude of challenges, which we overcome with varying degrees of success.

It is important for the first ten problems on each contest to be accessible to nearly every student. One of the most challenging aspects of putting a contest together is to create several problems that are both easy and original. Of the first ten problems on the 2005 AMC 12, the average 12A contestant answered 5.82 correctly and the average 12B contestant answered 6.54 correctly. The corresponding numbers for 2004 were 5.55 and 6.77.

It is also important that the later problems should challenge the very best students. It is especially critical that the standards for AIME qualification should be consistent from year to year. The overall percentage of AIME qualifiers among AMC 12 contestants was 11.8%, compared to 10.7% in 2004 and 11.6% in 2003. This year's total represents 11.3% of all 12A contestants and 12.8% of all 12B contestants. The number of perfect scores had only once been more than 10 until 2002 and 2003, when it increased to more than 30, but the number has decreased back to 17 in 2004 and 7 in 2005.

Beginning in 2002 the number of points awarded for a blank response on the AMC 12 was increased from 2 to 2.5. As a result, students could qualify for the AIME by solving as few as 11 problems. Analysis of student performances since then reveals that the average number of blank responses by AIME qualifiers has increased from about 8 to 11. This trend, suggesting that many bright students are simply ignoring problems of even moderate difficulty, runs counter to our goals. For that reason, beginning in 2007, the reward for a blank response will decrease from 2.5 to 1.5 points. It should be emphasized that in making this change, we are not attempting to reduce the number of AIME qualifiers. Because we are simultaneously working to improve the overall success rate on the first ten problems, we expect that the number of students achieving the minimum qualifying score of 100 will remain roughly constant.

In order to maintain the quality of our contest problems, we need a large pool of problems to choose from each year. If you or anyone you know would like to help create the contests, please contact CAMC Chair Elgin Johnston ([ehjohnst@iastate.edu](mailto:ehjohnst@iastate.edu)). I would also welcome your comments on anything I have said here or on any aspect of the AMC 12 contests. ## QUOTATIONS

### **Arkansas:**

This was a good opportunity for our students to see more of what there is out there. Thank you for an opportunity for stronger students to be challenged.

### **Arizona:**

Interesting! Provocative! Stimulating. Great Job.

### **Georgia:**

Always a great test! Thank you.

Your contest is easy to administer and it is well run. Great Job.

Again, two wonderfully fun, appropriate and challenging tests. Thanks.

Contest seemed more “student friendly” this year.

### **Iowa:**

Easy to administer. Challenging, but not impossible for students to do.

### **Indiana:**

Every year the overall quality of the contest is excellent. Thank you.

### **Maryland:**

Very well organized. Good and clear instructions.

### **Maine:**

The appeal of the AHSME/AMC starts and ends with its long history of excellently written, challenging problems in a consistently graded format.

### **Missouri:**

The 75 minute format is perfect. Please don't change that.

It is a wonderful easy competition to organize. Thank you.

### **Montana:**

Thank you for allowing schools to administer this test on site. It is hassle free.

As a student I participated in the contest during the 1970s and knew the value of challenging my ability to use math. I have my students participate for the same reason. Can't imagine why incentives would be necessary to get people to register.

### **North Carolina:**

Thank you for all the work you do to make this a success.

### **New Jersey:**

I think the contest is very well organized and easy to run. The students like the challenge and the free food we provide.

I really enjoy participating in the AMC 10/12 Competition. It is a great reward and challenge for our students. Thank you.

### **New York:**

I look forward to the contest every year.

Ease of implementation is nice.

## Quotations, Continued

Great Job as always!

### **Ohio:**

This is a wonderful event. I did it in high school in the 50's

Thanks for all you do. We enjoy it and it gives our kids some good experience.

### **Pennsylvania:**

This is a wonderful program, my students who love math love the challenge.

### **Texas:**

Thanks, I think the problems are fun, and they generate plenty of discussion which I like.

### **Virginia:**

I am retiring this year, I have given these contest in two school systems over the past 20 years. I have greatly appreciated having them as a tool to honor the outstanding young mathematicians whose gifts might otherwise go unnoticed or unappreciated.

### **Washington:**

Excellent! Since at least 1964 when I took the AHSME (*AMC 12*).

### **Wisconsin:**

Good contest. We look forward to it every year. Don't change anything.

### **Romania:**

Our students take this contest especially in order to have an international

## EDYTH MAY SLIFFE AWARDS FOR DISTINGUISHED HIGH SCHOOL MATHEMATICS TEACHING

The seventeenth set of winners of the Edyth May Sliffe Awards for Distinguished High School Mathematics Teaching was announced following the analysis of the 2005 American Mathematics Contest 12 (AMC 12). They are listed on the next page.

These awards are the result of a bequest made to the Mathematical Association of America (MAA) by Edyth May Sliffe, a retired high school teacher of mathematics at Emeryville, California. She made this bequest for the purpose of giving awards to high school mathematics teachers whose teams have done well on the AMC 12. Edyth Sliffe wanted to do this because her students had always done very well on the AMC 12 and received various honors, but she as a teacher had never received any recognition. She had always felt that such teachers should receive some awards.

The award recipients were selected from nominations received from the top three students of each of the 60 highest scoring teams on the AMC 12. These students were asked to recommend a teacher who in their opinion was most responsible for their success on the AMC 12.

In addition to a cash prize, the award winning teachers receive: a letter of congratulations from the President of the MAA; a certificate signed by the President of the MAA, the Chair of the Committee on the AMC 12, and the Director of the American Mathematics Competitions; a Sliffe pin; and a free one-year MAA membership. Whenever possible these awards are presented to the winners during an award ceremony arranged by their school administrators.

This Award serves as an excellent illustration of how a single person, in this case, Edyth May Sliffe, can have a substantial positive influence nationwide by taking a decisive action to further a cause he or she strongly believes.

# AMERICAN MATHEMATICS COMPETITION 8

The nineteenth Annual American Mathematics Contest 8 (AMC 8) was held on Tuesday, November 16, 2004, and it continued to be received with enthusiasm and support by an overwhelming number of schools, administrators, teachers and students. A total of 184,270 students from 2,701 schools registered for the examination.

The AMC 8 will continue to be a 25-question, 40-minute multiple choice exam that may be given during a regular mathematics class period. The Committee on the American Mathematics Competitions has approved the use of calculators on the 2005 AMC 8. The nature of the questions will not change from past tests. No problems on the test will require the use of a calculator, but students may have one available to use if they wish. High scoring students on the 2005 AMC 8 will be invited to participate in the 2006 AMC 10A & B and/or AMC 12A & B which are scheduled for TUESDAY, January 31, 2006 and/or WEDNESDAY, February 15, 2006.

Since the AMC 8 was centrally scored at the Office of the Director it was possible to obtain an enormous amount of data. Please note that the word “recorded” used below should be interpreted as indicating that the results are based on only the items that were mark sensed by the students. Some of the students failed to mark all items such as their grade and sex. The following represents some of the statistics relating to the examination:

**TABLE III: 2004 AMC 8 NATIONAL STATISTICS**

Number of Answer Forms received - .....	154,590
Number of schools sending in reports - .....	2,628
Number of students scoring 25 (a perfect paper) - .....	50
National student average - .....	9.94
Number of recorded female participants - .....	73,647
Number of recorded male participants - .....	78,265
Average of recorded female participants - .....	9.47
Average of recorded male participants - .....	10.4

**Grade level average:**

Grade	Number recorded	Average
≤5	1,496	8.15
6	15,248	8.51
7	51,679	9.55
8	84,399	10.48

Information regarding the implementation of the AMC 8 may be obtained from the American Mathematics Competitions at 800-527-3690 or on the AMC web site at: <http://www.unl.edu/amc>.

## SCHOOL AWARDS DESCRIPTION

### SCHOOL COMMITTEE AND DONOR NATIONAL AWARDS

In each of the eleven regions into which the United States and Canada are divided, the five schools with the highest team scores (sum of the highest three scores by participants) are recognized by Donor or Committee Awards.

- A. **Charles T. Salkind Memorial Silver Cup** — This silver cup, donated by the L.G. Balfour Company, Attleboro, MA, is awarded to the school with the highest team score (in any region).
- B. **William H. Fagerstrom Memorial Silver Cup** — This silver cup is awarded to the school with the second highest team score (in any region) and it is provided by the L.G. Balfour Company, Attleboro, MA..
- C. **Committee Bronze Cups** — In each of the regions in which a silver cup is not awarded the Committee on the American Mathematics Competitions provides a Bronze Cup to the school with the highest team score.

### SCHOOLS NOT RECEIVING A CUP ARE ELIGIBLE FOR THESE AWARDS

- D. **CAMC Mathematics Books\*** — In each of the eleven regions, five books are donated by the Committee on the American Mathematics Competitions to one school having a high team score.
- E. **W. H. Freeman Books\*** — In each of the eleven regions, a set of books, donated by W.H. Freeman and Company, San Francisco, CA is awarded to one school having a high team score.
- F. **Mathematics Magazine\*** — In each of the eleven regions, a one-year subscription is donated by the Committee on the American Mathematics Competitions to one or more schools having a high team score.
- G. **Pedagoguery Award** -- Awarded to one school in each of the 50 states, US Territories, Military Schools abroad, and Canada with the “Most Improved” Team Score on the AMC 10, and AMC 12.

### INTRAMURAL AWARDS

- 1. **Certificate of Honor** — This is awarded to schools with a team score of 400 or greater.
- 2. **Certificate of Merit** — This is awarded to schools with a team score of at least 300.

\* Distribution of awards is arranged so that schools do not receive duplicates of awards made to them in prior years.

CHART 13-B: AMC 10B ITEM DIFFICULTY

**AIME - AMERICAN INVITATIONAL MATHEMATICS  
EXAMINATION  
MESSAGE FROM THE AIME CHAIR**

Congratulations to those who qualified to participate in the AIME.

One of the purposes of the AIME is to aid in the selection process for qualification for the USAMO. However, those of us who work on constructing the AIME believe that it has additional purposes which are at least as important as USAMO selection. It is our hope that the AIME provides an interesting, enjoyable, challenging, motivational and educational experience for all those who take it.

To provide a proper transition between the AMC and the USAMO, the difficulty of the problems must encompass a broad range. It is our goal to include problems of sufficient difficulty so that even the top few high school problem solvers will consider it a worthy challenge to get a score as high as 14 or 15. At the same time, we include several problems whose difficulty is equivalent to some of those in the middle of the AMC 12, so that all qualifiers have a reasonable chance to correctly answer at least a few problems.

As is the case with many problems in mathematics, most of the problems can be solved in several different ways. Those students who focus their efforts on the first five problems should note that often these problems will succumb to a grind-it-out approach. These students will be rewarded when they take the time to read the solution manual to find that each of these problems has an elegant solution as well.

In fact, the solution booklet will prove rewarding for all contestants. We try to include alternate approaches, elegant shortcuts, and glimpses into areas of mathematics that our readers may then be motivated to explore.

It is our hope and belief that the number of high school students around the nation who have become aware of the pleasures of solving challenging math problems is growing. It is our wish that they and their teachers find the AIME a source of well constructed and worthwhile problems and a means of improving their problem solving skills. To continue to improve, students should attempt problems that are at the limit of their mathematical abilities. Decide if such problems are at the beginning, the middle or the end of the AIME, or perhaps on the USAMO, and work on those.

A debt of gratitude is owed to the panelists who contribute problems and suggestions to make the AIME as good as it is. Particular thanks must be given to the members of the AIME Committee, a group whose current members are Jacek Fabrykowski, Chris Jeuell, Jonathan Kane, and John Lawlor. It is they who deserve the credit for the AIME's quality. Thank you too to the staff in Lincoln who make all of the AMC Contests and events possible.

Happy solving.

# U.S.A. MATHEMATICAL OLYMPIAD

## QUALIFIERS FOR 2005 - UNITED STATES

The Thirty-fourth U. S. A. Mathematical Olympiad (USAMO) was held April 19 and 20, 2005. A total of 259 AIME participants from 183 schools were invited to take the examination on the basis of the criteria indicated in the AMC 10/12 Teachers' Manual. See also the Report of the Director in this Summary.

The top twelve students and their parents are invited to attend the Olympiad Awards Ceremony which is held annually in Washington, D.C.

*2004 Winners in Washington, D.C.*

*The 2004 United States Olympic team*

*Tony Zhang, Oleg Golberg, TianKai Liu, Aaron Pixton, Alison Miller and Matt Ince.*

The 2004 International Mathematical Olympiad (IMO), held in Athens, Greece, July 4-18, 2004, attracted 480 of the best young mathematicians from 85 countries. The IMO is the world's preeminent mathematical competition for high school-age students. The participating students won a total of 45 gold medals, 78 silver, and 120 bronze medals for solving, in a grueling nine-hour test administered July 12<sup>th</sup> and 13<sup>th</sup>, six math questions that would daunt even some professional mathematicians. Final results of the IMO are available on the web at <http://www.imo2004.gr/fimo/>.

The American Mathematics Competitions, [www.unl.edu/amc](http://www.unl.edu/amc), a program of The Mathematical Association of America, is a series of challenging tests which culminate in the selection of the USA-IMO team. Other major sponsors of the AMC and the USA-IMO team are (<http://www.Akamai.com>) and the University of Nebraska. The IMO team is chosen through a three-stage process of mathematics testing starting with almost half a million test-takers in middle school and high school.

The second place USA team ranked behind the first place team from China. Overall, the six members of the USA team won five gold medals, and one silver medal.

**Oleg Golberg** of Bedford, MA distinguished himself by accumulating 40 out of 42 possible points to have the best overall score on the USA team. **TianKai Liu** of Saratoga CA had 38 points for another of the USA's gold medals. **Aaron Pixton** of Vestal NY had 37 points, and **Alison Miller** of Niskayuna NY had 33 points, for a gold medal. She is the first female gold medal winner for a team from the USA. **Tony Zhang** of Arcadia CA also had 33 points, for a gold medal. **Matt Ince** of Arnold MO gained a silver medal with a score of 31 points.
