REPORT OF THE DIRECTOR

STEVEN DUNBAR

I. INTRODUCTION

I am extremely pleased to announce that this year over 225,000 students enrolled in the AMC 10/12 contests and a multitude of positive comments received from teachers once again confirmed that the Committee created examinations which were both exciting and challenging. Congratulations to all of you for continuing to recognize the fact the AMC 10 and 12 play a complementary role in supporting the mathematics curriculum at the high school level.

This summary includes a listing of results and awards associated with this year's AMC 10, AMC 12, AIME and USAMO.

II. 2007 ENROLLMENT ANALYSIS AND STATISTICAL RESULTS

Our outstanding AMC Lincoln office staffers were once again able to process and mail the results and awards in a timely and efficient manner. The results for schools with American Invitational Mathematics Examination qualifiers were mailed in less than two weeks following the exam, and all other results were mailed during the following week. This is rather remarkable when one considers the extensive checks which are necessary to ensure the accuracy of the results.

We continue to send an ever increasing pool of contest managers their schools' results by email. If you are able to communicate via email and wish to be added to our data base, please send a message to "hstran@amc.unl.edu" as soon as possible.

In addition to the results and awards of the AMC 10/12, this summary contains an analysis of the results of the 2006 American Mathematics Contest 8 (AMC 8) as well as the 2007 American Invitational Mathematics Examination and the 2007 USA Mathematical Olympiad.

Once again, the AMC 10 and AMC 12 was available in French, Spanish, Braille and Large Print.

III. INTERNATIONAL PARTICIPATION

I am pleased to report that the exam was administered in Puerto Rico, Guam, Virgin Islands, the Mariana Islands, many USA embassy and military schools, and individual International schools. A list of these schools is found in this summary. Special recognition is given to the teachers abroad who provide an opportunity for students at US military bases and embassies to participate in the AMC 10/12.

The CAMC extends its appreciation to Professor Paul Charlebois who translates the exams into French for students in Canada. We are also grateful to Professor Maria de Losada and Mario Cruz from Bogota, Colombia for translating the AMC 10 and AMC 12 into Spanish for use in Puerto Rico as well as in the USA and Colombia. Special thanks to Professor Peter Shiue for translating the exams into Chinese for more than 171 schools in Taiwan.

IV. 2008 CONTEST DATES, REGISTRATION AND FEES

There will again be two official dates for the AMC 10 & AMC 12. Please note that the contests are being held a week later than the two dates they were given in 2007.

Contest A will be held on the Second Tuesday in February (February 12, 2008), Contest B will be given 15 days later, Wednesday, February 27, 2008 All rules and

awards apply to both tests for all schools and students. Students will be allowed to take the exam booklets home with them the day of the contest.

The Registration cost for the 2007-2008 year has been kept the same as in the 2006-2007 season. We have again included the shipping cost in with the Registration Fee. Registration plus shipping for one AMC A Contest is \$40 per school, if you register by December 16, 2007. One bundle of ten AMC 12 exams will be \$16 and one bundle of ten AMC 10 exams will be \$14. There will be an extra \$10.00 charge included with the Registration for the second contest (B) to cover 2-day shipping. Contest B will be shipped on February 12, 2008, the day of Contest A.

The Committee on the American Mathematics Competitions has decided against the use of calculators on the 2008 AMC 10 and AMC 12. No problems on the test will require the use of a calculator. The nature of the questions will not change from past tests.

Materials for Contest A will be mailed in January of 2008. Please register by December 16, 2007 if possible. Completion of your registration as early as possible will be greatly appreciated by our office staff.

If you do not receive one of our many fall mailings, a current registration form will be available on our Web site. Please post our address: <http://www.unl.edu/amc>

V. NASSP'S SANCTION

The National Association of Secondary School Principals has placed this program on the NASSP National Advisory List of Contests and Activities for 2007-2008.

VI. THE 2007 AIME

A total of 8,472 students officially participated in the 25th American Invitational Mathematics Examination (AIME) which was held on Tuesday, March 13, 2007 or the "alternate" date, Wednesday, March 28, 2007. The comparable figure in 2006 is 22,636 students. The mean score on the AIME I was 3.23, and on the AIME II was 3.67, versus 2.71 on the AIME I, and 2.825, on the AIME II, in 2006. A list of the students with a score of at least 6 on the 2007 AIME is found in this summary.

The 2008 AIME is scheduled for Tuesday, March 18, 2008 and the alternate date is Wednesday, April 2, 2008. To qualify for the AIME in the year 2008 a student must score 100 or more or be in the top 5% on the AMC 12 or score 120 or more or be in the top 1% of the AMC 10 participants. The AIME consists of 15 questions with integer answers. A student's score is the number of correct answers. There is no partial credit. The time allowed is 3 hours.

VII. THE USAMO

The USA Mathematical Olympiad (USAMO) was held on April 24-25, 2007 in each respective student's school. 506 students were invited to participate this year. This is 70 more than the 430 who were invited to participate in 2006, because we received a grant from the Art of Problem Solving to cover the costs associated with the additional number of students. All of the participants were chosen based on the selection criteria published in the AMC 10/12 and AIME Teachers' Manuals. This summary contains a list of those participants as well as names of the USAMO Winners, and Honorable Mention.

The USAMO was once again administered over two days (4.5 hours each day). All papers were graded by the USAMO Committee and by Mathematical Olympiad Summer Program staff members on May 4th, 5th and 6th. We are grateful to these mathematicians for their excellent work associated with this important task.

Report of the Director, Continued

The top twelve USAMO students were honored in Washington, DC May 20th and 21st, 2007 with elaborate ceremonies held at the headquarters of the Mathematical Association of America (MAA) and the U.S. Department of State Building by invitation of the Director for Science, Office of Science and Technology Policy, Executive Office of the President, Dr. John Marberger. A Team Test was administered for two days after the ceremonies. The team for the 2007 International Mathematical Olympiad (IMO) to be held in Hanoi, Vietnam, in July is: **Sherry Gong**, Phillips Exeter Academy, Exeter, NH, **Eric Larson**, South Eugene High School, Eugene, OR, **Brian Lawrence**, Montgomery Blair High School, Silver Spring, MD, **Tedrick Leung**, North Hollywood High School, Winnetka, CA, **Arnav Tripathy**, East Chapel High School, Chapel Hill, NC, and **Alex Zhai**, University Laboratory High School, Champaign, Ill.

Documentary Film Crew

Hard at work during last summer's IMO in Ljubljana, Slovenia.

VIII. DOCUMENTARY FILM - USAMO AND IMO

MAA President-Elect Joe Gallian secured a grant from Larry Penn, who was on the US Math Olympiad Team in the late 1970s, to fund a documentary film about the students in the USAMO, and the USA team at the 2006 International Math Olympiad in Ljubljana, Slovenia. Larry Penn is now a partner in the investment firm Ellington Management Group. The film will be similar to the book "Count Down" and the film "Spellbound". The director is George Csicsery. He produced an award winning film on the mathematician Paul Erdos and is working on a film about the American mathematician Julia Robinson. As of this writing, filming at the USAMO awards ceremony and the IMO is complete, and post-production has begun. We expect to see the finished film in late 2007.

VIII. ACKNOWLEDGEMENT

The Committee acknowledges the contributions of many individuals and organizations for their assistance. We are indebted to the State and Canadian Provincial AMC Directors who provide assistance with the implementation of the AMC 10/12. Their tasks include contacting schools so that every student will have an opportunity to participate in the AMC contests, preparing a state/province summary of results and awards, and presenting awards. The names of the Directors are listed in this Summary.

Report of the Director, Continued

IX. CONTRIBUTIONS OF THE LINCOLN STAFF

The contributions of the AMC Lincoln staff members to the fulfillment of the responsibilities associated with the entire exam process in a 'beyond the call of duty' manner is something to behold. Let us once again applaud Donita Bowers, Marsha Conley, Rachelle Jensen, Linda McCormick, Ruthann Royer, Sawsan Mohamed, Kay Michael, Elizabeth Claassen and Shane Hesselgesser. This year we had UNL student help also: Nikki Bohl, and Gabe Smith. We are grateful to these staff members for their dedication to the AMC.

Janet Sylvester

On November 25, 2006 AMC Registration Clerk Janet Sylvester died suddenly and unexpectedly. Janet had been employed at the AMC office since January 2001, and her good spirit, ready laugh, efficiency and readiness to do whatever was needed at the AMC office will be missed.

X. SPONSORS / CONTRIBUTORS / AMC COMMITTEE MEMBERS

We appreciate the continued support of all of our Sponsors and Contributors. Kudos go to the members of the CAMC, AMC 8, AMC 10, AMC 12, AIME, USAMO Subcommittees and Advisory Panel members who give so much of their time to the formulation of consistent rules of operation and examinations of superior quality. The leadership given by the Chairs of these committees, namely, Prof. Elgin Johnston (CAMC Chair), Ms. Bonnie Leitch (AMC 8), Prof. David Wells (AMC 12), Prof. Doug Faires (AMC 10), and Mr. Steven Blasberg (AIME) and Prof. Cecil Rousseau (USAMO) is especially noteworthy.

Report of the Director, Continued

XI. CONTRIBUTIONS OF THE UNIVERSITY OF NEBRASKA

The operational location of the AMC has been at the University of Nebraska-Lincoln (UN-L) since 1970. The CAMC is grateful to Chancellor Harvey Perlman, Dean Richard Hoffman, and Prof. John Meakin in the UN-L Department of Mathematics, for their support.

XII. ADDITIONAL INFORMATION – INQUIRIES

USAMO – April 29-30, 2008

MESSAGE FROM THE CAMC CHAIR

On behalf of the Mathematical Association of America's Committee on American Mathematics Competitions, I want to thank the schools and teachers who took the time to administer the 2007 American Mathematics Contest 10 (AMC 10) and the 2007 American Mathematics Contest 12 (AMC 12). This year marked the 58th year that the American Mathematics Competitions have provided high quality mathematical competitions for United States high school students and for secondary students around the globe.

Many people work hard to make these exams possible. These include the State Contest Directors who make sure schools in their regions know about the exams; the outstanding staff in Lincoln, responsible for registration, printing, distributing, and scoring the exams, and

communicating results; and the members of the AMC 10/12 Committee and AMC Advisory Panel who spend long hours composing problems, writing and rewriting problem statements and solutions, and monitoring the difficulty level of the exam. Special thanks are due Douglas Faures, the AMC 10 Chair, and David Wells the AMC 12 Chair, who coordinate the exam creation efforts. I also want to thank the students for giving up part of their day to participate in the AMC 10 or the AMC 12.

Many of the AMC 10 and AMC 12 participants did well enough to qualify for the American Invitational Mathematics Examination (AIME) and a small number of AIME students then qualified for the United States of America Mathematical Olympiad (USAMO). Although these exams are given to fewer students than participate in the AMC 10/12, the committees that create these exams work just as hard as the AMC 10/12 Committees. Thanks to Steve Blasberg, the AIME Chair, and Cecil Rousseau, the USAMO Chair, for their efforts in coordinating the creation of high quality exams.

The mission of the CAMC is to promote interest in mathematics among K-12 students and to identify mathematically talented students through a series of mathematical exams. Thus, although the exams are designed to expose students to important mathematical ideas and give students a valuable problem solving experience, it is even more important that students find the exams challenging and fun. We hope that students enjoy not only taking the exams, but also preparing for the exams with teachers and other students, and discussing the answers and different solutions afterwards.

But the exams serve another purpose as well. Many of the AMC brochures and posters display the phrase "Make Mathematical History." The reason for studying mathematics in school is not just to learn how to do the problems in a textbook. A second purpose is to learn techniques and gain the confidence to tackle new or unfamiliar problems, to explore new areas...to make mathematical history in a sense. Many of our exam questions are designed to give students a chance to try their hand at problems that require them to apply their classroom knowledge in new situations and in different ways. And although students may not always succeed in such situations, they can grow mathematically by trying to solve such problems, and from follow up discussions after the exam.

We are always interested in ideas to help us better carry out our mission. The mathematics teachers in the schools are one of our most valued sources of ideas. We welcome any ideas you have that will help us to improve the AMC 10 and AMC 12 and help us to reach more students. In addition, we have a great need for high school teachers on the AMC Advisory Panel. If you are interested in contributing to our contests please contact me ehjohnst@iastate.edu, or visit the American Mathematics Competitions booth at next year's NCTM meeting in Salt Lake City.

MESSAGE FROM THE AMC 10 CHAIR

The AMC 10 test was developed to provide a better experience in mathematical problem solving for students in the lower high school grades. In years prior to 2000, students in these grades had to take a test that included problems on topics such as logarithms and trigonometry, subjects that they had not yet studied. The AMC 10 examination contains only problems based on subject material that students in ninth and tenth grade have likely seen, while still providing them with a challenging experience.

Our goal for the AMC 10 has been to design the contests so that the average student can work on between 15 and 20 problems and get at least 10 of those correct. This would give an average score of between

72.5 and 85, since a student receives 6 points for each correct problem and 1.5 points for each unanswered problem.

The AMC 10 and AMC 12 tests have common problems, which has the advantage of permitting students taking the AMC 10 to compare their solutions with the students taking the AMC 12, and allows teachers to better identify excellent problem solvers at a young age. However, we are concerned that if we predictably have a large number of common problems on the exams, it might encourage younger students to take the AMC 12 before they are ready, since a larger proportion of students taking the AMC 12 qualify for the American Invitational Mathematics Examination (AIME). As a consequence, you will likely see an unpredictable fluctuation in the number of common problems from a minimum of about nine to a maximum of about thirteen.

A new policy for AIME qualifying was introduced beginning with the 2000 AMC examinations. Those students taking the AMC 12 and scoring over 100 qualify, as usual, as do those students scoring in the top 5% on the AMC 12 examination. This new policy is more equitable since it guards against the possibility of a particularly difficult examination, one on which the scores are uniformly lower than normal, skewing the number of AIME qualifiers.

Beginning with the 2004 contest we instituted a similar qualifying system for the students taking the AMC 10 contests. Students scoring in the top 1% of either AMC10 qualify for the AIME, as well as all those who score 120 or more on one of these contests. The requirement is set higher for AMC 10 qualifiers for two reasons:

- First, the AIME can be quite intimidating, and we do not want young students to be discouraged by poor performance on this examination.
- Second, we would like to ensure that any student qualifying for the AIME by virtue of placement on the AMC 10 would likely also qualify for the AIME in subsequent years when taking the AMC 12.

It could be very disappointing for a student to be an AIME qualifier in grade 10 but not in subsequent high school years. By restricting the number of AIME qualifiers from the AMC 10 to about the top 1%, we hope not to exclude any very good young students for whom the AIME would be an appropriate experience, but also not put students in a situation where they do not have much opportunity to succeed.

This is my final year as the AMC 10 Chair; I am being succeeded by LeRoy Wenstrom, who has been working on the exams for a number of years. Under LeRoy's leadership the AMC will continue to try to improve the experience of students taking the AMC, but the way in which we will do so depends significantly on the feedback that we receive from teachers giving the examinations and from students taking them.

Please send LeRoy (lwenstrom@gmail.com) or Elgin Johnston, the AMC Chair (ehjohnst@iastate.edu) any comments you have with regard to the AMC 10 examination.

MESSAGE FROM THE AMC 12 CHAIR

The AMC 12 contest is in some sense a living entity, constantly evolving to adapt to the changing needs of the students and teachers who support it by their involvement. When I was appointed as Chair of the AMC 12 Committee in 2001, the AMC 10 and AMC 12 contests were only two years removed from their common ancestor, the AHSME. The years since then have seen the establishment of the A and B forms of each contest, as well as two changes in the scoring system.

The most significant change from prior years in the 2007 contests was the institution of a new scoring system, in which students earned 6 points for each correct answer, 0 for each incorrect answer, and 1.5 for each item left blank. In the previous scoring system, instituted in 2002, the number of points awarded for an item left blank was 2.5. The change was intended to encourage students, especially the most talented ones, to attempt a greater number of problems. To do a rough assessment of the effect of the change, I compared the average number of right (R), wrong (W), and blank (B) responses on the 2007 contests to those on the 2005 contests. The year 2005 was chosen for comparison because the average scores on the 2007 12A and 12B contests under the old scoring system would have been 78.1 and 83.4, comparing nicely with the average scores of 78.7 and 83.4 from 2005. If each student's performance on the 25 items is reported as an ordered triple (R, W, B), the averages for the 2005 contests are (7.7, 4.3, 13.0) and (8.8, 4.0, 12.2). For the 2007 contests, the averages are (8.3, 5.4, 11.3) and (9.6, 5.1, 10.3). That is, students attempted an average of nearly two more items on the 2007 contests than on the 2005 contests. It is reasonable to conjecture that the increase was even sharper among students attempting to qualify for the AIME.

It has been pointed out that the change in the scoring system coincided with a sharp drop in the number of AIME qualifiers from 21.9% of participants in 2006 to 7.7% in 2007. However, it should be noted that the difference is almost entirely due to the unusually low level of difficulty of the 2006 contests. The percentage of AIME qualifiers in 2002-2005 varied between 9.7% and 11.8%.

A change of even greater significance is on the horizon for 2008, when calculators will no longer be permitted on any of the AMC contests. This change comes after repeated lengthy discussions involving AMC staff, contest committee chairs, and sponsoring organizations. Although I am an enthusiastic advocate of calculator usage by students in classrooms, I strongly support the decision to make the contests calculator-free for several reasons. The foremost of those has to do with the fact that not every contestant has the same level of calculating power available. In order not to place any student at a disadvantage, we have had to create problems that render even the most sophisticated calculator essentially useless. One advantage of a calculator-free format is that the contests can once again contain some of the easier computational exercises that often appeared as early problems on pre-1994 AHSME contests.

In order to maintain the quality of our contest problems, we need a large pool of problems to choose from each year. If you or anyone you know would like to help create the contests, please contact CAMC Chair Elgin Johnston (ehjohnst@iastate.edu). I would also welcome your comments on anything I have said here or on any aspect of the AMC 12 contests. I can be reached at dmw8@psu.edu or at 724-334-6749 (office) or 412-486-9478 (home).

QUOTATIONS

ENGLAND

(written after the 2007 AIME) May I take this opportunity to say how excellent these exams are. We shall be(gin) using AMC 8 next year with all our top sets for the first time. Please pass on my appreciation to the problem setters and everyone involved. Regards,

Always look toward the sun
and the shadows will fall behind you.
- English Sundial

Greetings from the land of Ben Franklin, I hope this message of electronic wizardry finds you and all at the American Math Competitions "looking towards the sun".

It's hard for me to believe, but I just completed my 36th year of teaching. The end of a school year always comes with a flourish of celebrations and traditions, full of energy, spirit, hopefulness and remembrance. The summer affords me a time of renewal and then I get to start all over again. In that way, the teaching profession is unique.

This morning, I have been taking time to reflect upon some of the things that I have learned through the American Math Competitions. Here are a few of my thoughts.

(1) I have learned that everyone wants to live on top of the mountain, but all the happiness and growth occurs while you're climbing it. In recent years, I have really enjoyed climbing the mountain with the American Math Competitions.

(2) I have learned that the easiest way for me to grow as a person is to surround myself with talented people. The folks associated with the American Math Competitions are people with remarkable gifts and backgrounds - people who helped my students and I grow considerably.

(3) I have learned that life with the American Math Competitions is full of intellectual stimulation, challenge, wonder, and joy!

Thank you American Math Competitions!

VERMONT

.. At least you know that the billion kids at AoPS are desperately eager/grateful/impatient for every piece of information you get out to them. Then they exchange a billion opinions on the informaiton. There are threads analyzing the most prevalent first initial of USAMO qualifiers. There's a separate thread analyzing the last name initial relative prevalence and grids analyzing the top USAMO schools and so on. . . .But it is so wonderful to see the eagerness of these students - and the AMC is one of the only organizations in America that feeds and fuels that academic enthusiasm.

AMC 10B/12B PARTICIPATING INSTITUTIONS OF HIGHER EDUCATION

During the 2006-2007 school year we tried something new. We contacted colleges and universities across the nation, through their Mathematical Association of America members, asking them to offer the AMC 10B/12B to high school students in their area who did not have the contests offered in their own schools. We were very pleased with the results. We had participation from 43 institutions. 618 students taking the AMC12B with 120 of these qualifying to take the AIME, and 417 students taking the AMC 10B with 16 of these qualifying for the AIME.

EDYTH MAY SLIFFE AWARDS

DISTINGUISHED HIGH SCHOOL MATHEMATICS TEACHING

The nineteenth set of winners of the Edyth May Sliffe Awards for Distinguished High School Mathematics Teaching was announced following the analysis of the 2007 American Mathematics Contest 12 (AMC 12). The twenty-two winners are listed on the next two pages. The award recipients were selected from nominations received from the top three students of each of the 60 highest scoring teams on the AMC 12. These students were asked to recommend a teacher who in their opinion was most responsible for their success on the AMC 12.

These awards are the result of a bequest made to the Mathematical Association of America (MAA) by Edyth May Sliffe, a retired high school teacher of mathematics at Emeryville, California. She made this bequest for the purpose of giving awards to high school mathematics teachers whose teams have done well on the AMC 12. Edyth Sliffe wanted to do this because her students had always done very well on the AMC 12 and received various honors, but she as a teacher had never received any recognition. She had always felt that such teachers should receive some awards.

In addition to a cash prize, the award winning teachers receive: a letter of congratulations from the President of the MAA; a certificate signed by the President of the MAA, the Chair of the Committee on the AMC 12, and the Director of the American Mathematics Competitions; a Sliffe pin; a complimentary one-year MAA membership; and a complimentary one-year NCTM (National Council of Teachers of Mathematics) membership. Whenever possible these awards are presented to the winners during an award ceremony arranged by their school administrators.

This Award serves as an excellent illustration of how a single person, in this case, Edyth May Sliffe, can have a substantial positive influence nationwide by taking a decisive action to further a cause he or she strongly believes.

AMERICAN MATHEMATICS COMPETITION 8

The twenty-second Annual American Mathematics Contest 8 (AMC 8) was held on Tuesday, November 14, 2006, and it continued to be received with enthusiasm and support by an overwhelming number of schools, administrators, teachers and students. A total of 169,650 students from 2,269 schools registered for the examination.

The AMC 8 will continue to be a 25-question, 40-minute multiple choice exam that may be given during a regular mathematics class period. The Committee on the American Mathematics Competitions has decided they will no longer allow the use of calculators starting in the year 2008. This means that the last year calculators will be allowed on the AMC 8 is in 2007. As usual, no problems on the test will require the use of a calculator. The nature of the questions will not change from past tests. High scoring students on the 2007 AMC 8 will be invited to participate in the 2008 AMC 10A & B and/or AMC 12A & B which are scheduled for TUESDAY, February 12, 2008 and/or WEDNESDAY, February 27, 2008.

Since the AMC 8 was centrally scored at the Office of the Director it was possible to obtain an enormous amount of data. Please note that the word “recorded” used below should be interpreted as indicating that the results are based on only the items that were mark sensed by the students. Some of the students failed to mark all items such as their grade and sex. The following represents some of the statistics relating to the examination:

TABLE III: 2006 AMC 8 NATIONAL STATISTICS

| | |
|---|---------|
| Number of Answer Forms received - | 147,210 |
| Number of schools sending in reports - | 2,235 |
| Number of students scoring 25 (a perfect paper) - | 293 |
| National student average - | 10.14 |
| Number of recorded female participants - | 68,145 |
| Number of recorded male participants - | 76,283 |
| Average of recorded female participants - | 9.61 |
| Average of recorded male participants - | 10.64 |

Grade level average:

| Grade | Number recorded | Average |
|-------|-----------------|---------|
| ≤5 | 1,853 | 8.21 |
| 6 | 16,639 | 8.51 |
| 7 | 48,479 | 9.82 |
| 8 | 78,038 | 10.75 |

Information regarding the implementation of the AMC 8 may be obtained from the American Mathematics Competitions at 800-527-3690 or on the AMC web site at: <http://www.unl.edu/amc>.

AMC 8 STUDENT AWARD RECIPIENTS

UNITED STATES

The students listed here are designated as National Student Award Recipients for achieving a perfect score of 25 on the 2006 AMC 8. They will receive an award consisting of a Certificate of Distinction and an award plaque.

NATIONAL SCHOOL AWARDS

COMMITTEE AND DONOR AWARD DESCRIPTIONS

In each of the eleven regions into which the United States and Canada are divided, the five schools with the highest team scores (sum of the highest three scores by participants) are recognized by Donor or Committee Awards.

This year Institutions of Higher Education participated in our AMC 10B/12B, offering supplemental contest sites for area students. Institutions do not qualify for these Awards, but are mentioned here for recognition (*marked with **) when they placed in the top echelon.

- A. **Charles T. Salkind Memorial Silver Cup** — This silver cup, donated by the L.G. Balfour Company, Attleboro, MA, is awarded to the school with the highest team score (in any region).
- B. **William H. Fagerstrom Memorial Silver Cup** — This silver cup is awarded to the school with the second highest team score (in any region) and it is provided by the L.G. Balfour Company, Attleboro, MA..
- C. **Committee Bronze Cups** — In each of the regions in which a silver cup is not awarded the Committee on the American Mathematics Competitions provides a Bronze Cup to the school with the highest team score.

SCHOOLS NOT RECEIVING A CUP ARE ELIGIBLE FOR THESE AWARDS

- D. **CAMC Mathematics Books*** — In each of the eleven regions, five books are donated by the Committee on the American Mathematics Competitions to one school having a high team score.
- E. **W. H. Freeman Books*** — In each of the eleven regions, a set of books, donated by W.H. Freeman and Company, San Francisco is awarded to one school having a high team score.
- F. **Mathematics Magazine*** — In each of the eleven regions, a one-year subscription is donated by the Committee on the American Mathematics Competitions to one or more schools having a high team score.
- G. **Pedagogy Award** -- Awarded to one school in each of the 50 states, US Territories, Military Schools abroad, and Canada with the “Most Improved” Team Score on the AMC 10, and AMC 12.

INTRAMURAL AWARDS

- 1. **Certificate of Honor** — This is awarded to schools with a team score of 400 or greater.
- 2. **Certificate of Merit** — This is awarded to schools with a team score of at least 300.

** Distribution of awards is arranged so that schools do not receive duplicates of awards made to them in prior years.*

STUDENT DISTINGUISHED HONOR ROLL

INTERNATIONAL

AMC 10 A&B

The AMC 10 A&B International Student Distinguished Honor Roll includes participants from International Schools who score 130.0 or above on the AMC 10 A or 132.0 or above on the AMC 10B. It is based on 1% of the top scoring students. An Honor Roll Pin and a certificate are awarded to these contestants. The listing is by individual score in each region.

AIME - AMERICAN INVITATIONAL MATHEMATICS EXAMINATION

MESSAGE FROM THE AIME CHAIR

Congratulations to those who qualified to participate in the AIME.

One of the purposes of the AIME is to aid in the selection process for qualification for the USAMO. However, those of us who work on constructing the AIME believe that it has other purposes which are at least as important as USAMO selection. It is our hope that the AIME provides an interesting, enjoyable, challenging, motivational and educational experience for all those who take it.

To provide a proper transition between the AMC and the USAMO, the difficulty of the problems must encompass a broad range. It is our goal to include problems of sufficient difficulty so that even the top few high school problem solvers will consider it a worthy challenge to get a score as high as 14 or 15. At the same time, we include several problems whose difficulty is equivalent to some of those in the middle of the AMC 12, so that all qualifiers have a reasonable chance to correctly answer at least a few problems.

As is the case with many problems in mathematics, most of the problems can be solved in several different ways. Those students who focus their efforts on the first five problems should note that often these problems will succumb to perseverance and application of elementary principles. These students will be rewarded when they take the time to read the solution manual to find that each of these problems has an elegant (and quick) solution as well.

In fact, the solution booklet should prove rewarding for all contestants, even the best. We try to include alternate approaches, elegant shortcuts, and glimpses into areas of mathematics that competitors may then be motivated to explore.

It is our hope and belief that the number of high school students around the nation who have become aware of the pleasures of solving challenging math problems is growing. It is our wish that they and their teachers find the AIME a source of well constructed and worthwhile problems and a means of improving their problem solving skills. To continue to improve, students should attempt problems that are at the limit of their mathematical abilities. Decide if such problems are at the beginning, the middle or the end of the AIME, or perhaps on the USAMO, and work on those.

A debt of gratitude is owed to the panelists who contribute problems and suggestions to make the AIME as good as it is. Particular thanks must be given to the members of the AIME Committee, a group whose current members are Jacek Fabrykowski, Chris Jeuell, Jonathan Kane, John Lawlor, and Bruce Reznick. It is they who deserve the credit for the quality of the AIME exam. Thank you too to the staff in Lincoln who make all of the AMC Contests and events possible.

Happy solving.

U.S.A. MATHEMATICAL OLYMPIAD

MESSAGE FROM THE USAMO CHAIR

I join members of the USAMO Committee (Zuming Feng, Gregory Galperin, Kiran Kedlaya, Richard Stong, Zoran Sunk) And ex-officio members (Steven Blasberg, Steven Dunbar, Elgin Johnston, David Wells) in extending hearty congratulations to all who participated in the 2007 USAMO and encouragement to those who look forward to taking part next year.

In its current form, the USAMO is patterned after the IMO (International Mathematical Olympiad) in that it is given over a two day period and consists of six problems, each worth 7 points. Also, the range of subjects covered is basically the same as at the IMO. These include algebra, combinatorics, geometry, inequalities,

number theory, and blendings of these topics, for example combinatorial geometry. The committee makes every effort to choose engaging and original problems.

In addition to members of the committee, there are panelists – many of whom are former USAMO winners – who contribute and evaluate problems. Finally, the AMC staff makes sure that the whole contest operation runs smoothly. Thanks to all concerned.

USAMO problems have increased in sophistication over the years. This trend mirrors the growing interest in problem solving at the highest level, and the increased number of contest related opportunities suitable for our most gifted students. But even in the early days of the USAMO, the problems were more than enough for many adult mathematicians! In 1974, the problems of the 3rd USAMO were published in the New York Times. Rumor has it that some work at AT&T Bell Laboratories was put on hold while members of the staff tried to find solutions. Were a current USAMO to receive the same attention, there might be similar disruptions at Microsoft and Google.

Grading the 2007 USAMO

U.S.A. MATHEMATICAL OLYMPIAD

QUALIFIERS FOR 2007

UNITED STATES

The Thirty-sixth U. S. A. Mathematical Olympiad (USAMO) was held April 24 and 25, 2007. A total of 506 AIME participants from 265 schools were invited to take the examination on the basis of the criteria indicated in the AMC 10/12 Teachers' Manual. See also the Report of the Director in this Summary.

2007 USAMO NATIONAL AWARDS

AKAMAI FOUNDATION SCHOLARSHIPS

For the past six years, the Akamai Foundation, dedicated to fostering excellence in math education in the United States (grades K-12) has been an ardent supporter of the Mathematical Association of America (MAA). The Foundation was established in 2000 by Akamai Technologies, Inc., the leading global service provider for accelerating content and business processes online, and is funded solely by Akamai executives, its employees and individuals outside the company. This year the Akamai grant is being used to fund two very important initiatives. The first is the allocation of \$50,000 to fund the Akamai Foundation Scholarships. These scholarships are given to the three high school students who have the top scores in the 2007 USAMO. College scholarships of \$25,000, and \$15,000 were awarded by the Foundation at the 36th Annual USAMO Awards Ceremonies held on May 25, 2007.

CLAY MATHEMATICS AWARD

Andrew Geng, a 12th grader at Westford Academy in Westford, MA, is this year's recipient of the Clay Olympiad Scholar Award, which is given to the individual that presented the "most creative" solution to an Olympiad problem. His prize consists of a plaque and a cash award. His school also receives a cash award.

BALLES USAMO WINNER AWARDS

Robert P. Balles is a lifelong student of mathematics, former community college instructor, and retired businessman. He is an alumnus of Fordham University, Harvard University, and California State University.

He has established an endowed award that each year will honor the USAMO winning students with a \$500 Series I U.S. Savings Bond.

MATHEMATICAL OLYMPIAD SUMMER PROGRAM

This year's Mathematical Olympiad Summer Program (MOSP) will be held on the campus of the University of Nebraska-Lincoln June 11-July 2, 2007. Students will be treated to classes on advanced mathematical topics, special guest speakers, mathematical contest training, and related social and mathematical activities.

2006 INTERNATIONAL MATHEMATICAL OLYMPIAD

2006 U.S.A. International Mathematical Olympiad Team

With their medals, from left: Alex Saltman (deputy leader), Ryan Ko, Zuming Feng (Leader), Zach Abel, Yi Sun, Steven Dunbar (AMC Director), Alex Zhai, Arnav Tripathy and Zeb Brady.

The 47th International Mathematical Olympiad (IMO) was held July 10 - July 18, 2006 in Ljubljana, Slovenia. The International Mathematical Olympiad (IMO) is the pre-eminent mathematical competition for high-school age students from around the world. The IMO consists of solving 6 extremely challenging mathematical problems in a 9-hour competition administered over two days. More information about the 47th International Mathematical Olympiad is at: <http://imo2006.dmf.si/>

The six USA team members won 2 Gold medals and 4 Silver medals. The USA team ranked 5th among all 90 participating countries.

- * Zachary Abel, Silver medal; graduate of Greenhill School, Dallas, TX
- * Zarathustra Brady, Gold medal; attends Magnolia Science Academy in Van Nuys, CA
- * Ryan Ko, Silver medal; graduate of Philips Exeter Academy, Exeter NH, from Allendale, NJ
- * Yi Sun, Silver medal; graduate of Harker School, Saratoga, CA
- * Arnav Tripathy, Gold medal; attends East Chapel Hill High School, Chapel Hill, NC
- * Alex Zhai, Silver medal; attends University Laboratory High School, Champaign, IL

At the IMO, the USA team has consistently finished in the top five for the last seven years. At this year's IMO 498 young mathematicians from 90 countries competed in solving problems posed in a test administered on July 12 and July 13. Overall, the IMO awarded 42 gold medals, 87 silver and 124 bronze medals.

BALLES TEAM AWARDS

Robert P. Balles has established an award that will honor the student participants in the annual International Mathematical Olympiad (IMO) with a \$1,000 Series I U.S. Savings Bond. Each Series I U.S. Savings Bond features a prominent American who has contributed to the history of the country. Appropriately, this particular denomination features Albert Einstein.

The MAA gratefully thanks Mr. Balles for his generosity in the recognition of the six extraordinary student mathematicians who compete annually on behalf of this country against the rest of the world's student mathematical power. The IMO Team for 2007 is: **Sherry Gong**, Phillips Exeter Acad, Exeter, NH, **Eric Larson**, S. Eugene HS, Eugene, OR, **Brian Lawrence**, Montgomery Blair HS, Silver Spring, MD, **Tedrick Leung**, N. Hollywood HS Winnetka, CA, **Arnav Tripathy**, E. Chapel HS, Chapel Hill, NC, and **Alex Zhai**, Univ. Laboratory HS, Champaign, Ill.
