# REPORT OF THE DIRECTOR

## STEVEN DUNBAR

### I. INTRODUCTION

I am extremely pleased to announce that this year over 220,000 students enrolled in the 59<sup>th</sup> annual AMC 12 contests and 9<sup>th</sup> annual AMC 10. A multitude of positive comments received from teachers once again confirmed that the Committee created examinations which were both exciting and challenging. Congratulations to all of you for continuing to recognize the fact the AMC 10 and 12 play a complementary role in supporting the mathematics curriculum at the high school level.

This summary includes a listing of results and awards associated with this year's AMC 10, AMC 12, AIME and USAMO.

### II. 2008 ENROLLMENT ANALYSIS AND STATISTICAL RESULTS

Our outstanding AMC Lincoln office staffers were once again able to process and mail the results and awards in an efficient manner. The results for schools with American Invitational Mathematics Examination qualifiers were mailed in less than three weeks following the exam, and all other results were mailed during the following week. This is rather remarkable when one considers the extensive checks which are necessary to ensure the accuracy of the results.

We continue to send an ever increasing pool of contest managers their schools' results by email. If you are able to communicate via email and wish to be added to our database, please send a message to "[hstran@amc.unl.edu](mailto:hstran@amc.unl.edu)" as soon as possible.

In addition to the results and awards of the AMC 10/12, this summary contains an analysis of the results of the 2007 American Mathematics Contest 8 (AMC 8) as well as the 2008 American Invitational Mathematics Examination and the 2008 USA Mathematical Olympiad.

Once again, the AMC 10 and AMC 12 were available in French, Spanish, Braille and Large Print.

### III. INTERNATIONAL PARTICIPATION

I am pleased to report that the exam was administered in Puerto Rico, Guam, the Mariana Islands, many USA embassy and military schools, and individual International schools. We thank the teachers abroad who provide an opportunity for students at US military bases and embassies, as well as other international schools, to participate in the AMC 10/12.

The CAMC extends its appreciation to Professor Paul Charlebois who translates the exams into French for students in Canada. We are also grateful to Professors Maria de Losada and Mario Cruz from Bogota, Colombia for translating the AMC 10 and AMC 12 into Spanish for use in Puerto Rico as well as in the USA and Colombia. Special thanks to Professor Peter Shiue for translating the exams into Chinese for more than 176 schools in Taiwan.

### IV. 2009 CONTEST DATES, REGISTRATION AND FEES

There will again be two official dates for the AMC 10 & AMC 12. Contest A will be held on the second Tuesday in February (February 10, 2009), Contest B will be given 15 days later, Wednesday, February 25, 2009. All rules and awards apply to both tests for all schools and students. Students will be allowed to take the exam booklets home

## Report of the Director, Continued

with them the day of the contest.

The Registration cost for the 2008-2009 year has been kept the same as in the 2007-2008 season. We have again included the shipping cost in with the Registration Fee. Registration plus shipping for one AMC A Contest is \$40 per school, if you register by December 15, 2008. However, although one bundle of ten AMC 12 exams will continue to be \$16, one bundle of ten AMC 10 exams will increase to \$15. There will be an extra \$10.00 charge included with the Registration for the second contest (B) to cover 2-day shipping. Contest B will be shipped on February 10, 2009, the day of Contest A.

The Committee on the American Mathematics Competitions has continued its decision against the use of calculators on the 2009 AMC 10 and AMC 12. No problems on the test will require the use of a calculator. The nature of the questions will not change from past tests.

Materials for Contest A will be mailed in January of 2009. Please register by December 15, 2008 if possible. Completion of your registration as early as possible will be greatly appreciated by our office staff.

If you do not receive one of our many fall mailings, a current registration form will be available on our Web site. Please check on-line at: <http://www.unl.edu/amc>

### V. NASSP'S SANCTION

The National Association of Secondary School Principals has placed this program on the NASSP National Advisory List of Contests and Activities for 2008-2009.

### VI. THE 2008 AIME

A total of 8,584 students officially participated in the 26<sup>th</sup> American Invitational Mathematics Examination (AIME) which was held on Tuesday March 18, 2008 or the "alternate" date, Wednesday, April 2, 2008. The comparable figure in 2007 is 8,472 students. The mean score on the AIME I was 4.77, and on the AIME II was 5.27, versus 3.23 on the AIME I, and 3.67, on the AIME II, in 2007. A list of the students with a score of at least 6 on the 2008 AIME is found in this summary.

**The 2009 AIME is scheduled for Tuesday, March 17, 2009 and the alternate date is Wednesday, April 1, 2009.** To qualify for the AIME in the year 2009 a student must score 100 or more or be in the top 5% on the AMC 12 or score 120 or more or be in the top 1% of the AMC 10 participants. The AIME consists of 15 questions with integer answers. A student's score is the number of correct answers. There is no partial credit. The time allowed is 3 hours.

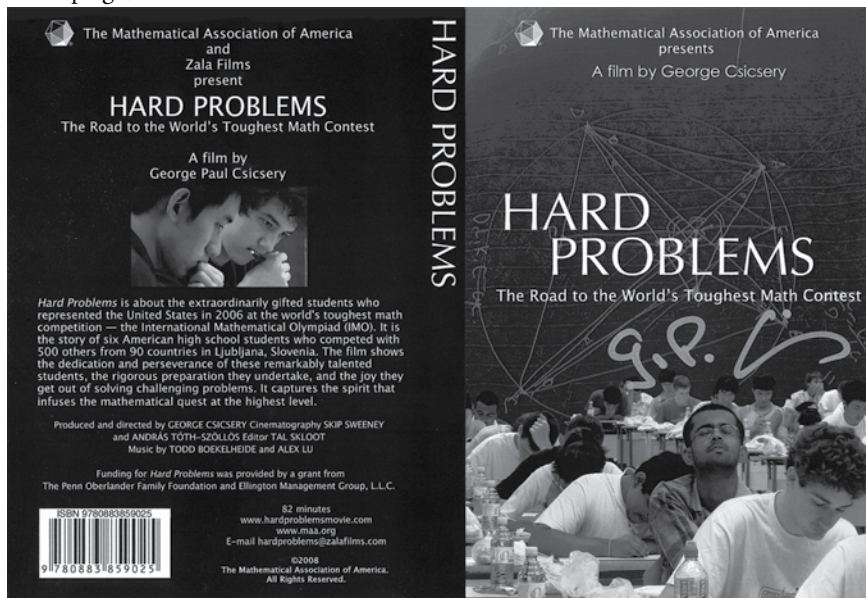

### VII. THE USAMO

The USA Mathematical Olympiad (USAMO) was held on April 29-30, 2008 in each respective student's school. 505 students were invited to participate this year. This is more than double the number who were invited to participate a few years ago because we again received a grant from the Art of Problem Solving to cover the costs associated with the additional number of students. All of the participants were chosen based on the selection criteria published in the AMC 10/12 and AIME Teachers' Manuals. This summary contains a list of those participants as well as names of the USAMO Winners and those students who achieved Honorable Mention.

The USAMO was once again administered over two days (4.5 hours each day). All papers were graded by the USAMO Committee and by Mathematical Olympiad Summer Program staff members on May 9<sup>th</sup>, 10<sup>th</sup> and 11<sup>th</sup>. We are grateful to these mathematicians for their excellent work associated with this important task.

## Report of the Director, Continued

The top twelve USAMO students were honored in Washington, DC June 8-9, 2008 with elaborate ceremonies held at the headquarters of the Mathematical Association of America (MAA) and the U.S. Department of State Building by invitation of the Director for Science, Office of Science and Technology Policy, Executive Office of the President, Dr. John Marburger. A Team Test was administered for two days before the ceremonies, June 7<sup>th</sup> and 8<sup>th</sup>. The team for the 2008 International Mathematical Olympiad (IMO) to be held in Madrid, Spain, in July is: Paul Christiano, The Harker School, Saratoga, CA., Shaunak Kishore, Unionville-Chaddsford High School, West Chester, PA., Evan O'Dorney, Berkeley Math Circle, Danville, CA., Colin Sandon, Essex High School, Essex Junction, VT., Krishanu Sankar, Horace Mann High School, Hastings On Hudson, NY., and Alex Zhai, Univ. Laboratory High School, Champaign, IL.

### VIII. DOCUMENTARY FILM - HARD PROBLEMS

In 2005 MAA President Joe Gallian secured a grant from Larry Penn, who was on the US Math Olympiad Team in the late 1970s, to fund a documentary film about the students in the USAMO, and the USA team at the 2006 International Math Olympiad. Larry Penn is now a partner in the investment firm Ellington Management Group. The director is George Csicsery. He produced an award winning film on the mathematician Paul Erdos and just finished a film about the American mathematician Julia Robinson. The documentary film is now finished and the Deluxe Edition DVD is available from the MAA Bookstore at [www.maa.org](http://www.maa.org).

### IX. ACKNOWLEDGEMENT

The Committee acknowledges the contributions of many individuals and organizations for their assistance. We are indebted to the State and Canadian Provincial AMC Directors who provide assistance with the implementation of the AMC 10/12. Their tasks include contacting schools so that every student will have an opportunity to participate

in the AMC contests, preparing a state/province summary of results and awards, and presenting awards. The names of the Directors are listed in this Summary.

### X. CONTRIBUTIONS OF THE LINCOLN STAFF

The contributions of the AMC Lincoln staff members to the fulfillment of the responsibilities associated with the entire exam process in a 'beyond the call of duty' manner is something to behold. Let us once again applaud AMC staff members Donita Bowers, Marsha Conley, Rachele Jensen, Linda McCormick, RuthAnn Royer, Kay Michael, Elizabeth Claassen and Lynette White. Our University student helpers are Wen Luo and Juan Davila. Our temporary staff this year were Tiffany Graviette, Trish Graeve, Maxine Turvey and Alex McKeighan. I welcome this opportunity to commend their excellent work.

In December 2007 AMC longtime staffer Donita Bowers made the decision to retire after more than 30 years with the Competitions. Many of you may have talked to her on the phone or corresponded with her via email and so know she has a vast knowledge of AMC history and precedents. Her experience, wisdom, knowledge of all the AMC history and procedures, as well as her warm personality and good humor are very much missed at the AMC office.

### XI. SPONSORS / CONTRIBUTORS / AMC COMMITTEE MEMBERS

We appreciate the continued support of all of our Sponsors and Contributors. Kudos go to the members of the CAMC, AMC 8, AMC 10, AMC 12, AIME, USAMO Subcommittees and Advisory Panel members who give so much of their time to the formulation of consistent rules of operation and examinations of superior quality. The leadership given by the Chairs of these committees, namely, Prof. Elgin Johnston (CAMC Chair),

## Report of the Director, Continued

Ms. Bonnie Leitch (AMC 8), Prof. David Wells (AMC 12), Dr. LeRoy Wenstrom (AMC 10), Mr. Steven Blasberg (AIME) and Prof. Cecil Rousseau (USAMO) is especially noteworthy.

The year of 2007 saw several changes among the Chairs of our Committees. Prof. Doug Faires, of Youngstown State University originated the idea of having an AMC 10 contest for students in grades 9 and 10. He ably guided the development of this popular new contest through its first 8 years including the 2008 contest. Prof. Faires' high standards for clarity of problem statement and solution, precision of notation and his taste for beautiful new problem types set the pace for excellence on the AMC 10. Prof. Elgin Johnston of Iowa State University gently and patiently guided the oversight Committee on the American Mathematics Competitions through years of challenging growth and development as well as contributing wonderful problems and solutions to all levels of the competitions. At the turn of 2008 he handed over the CAMC Chair responsibilities to Prof. David Wells of Pennsylvania State University who in turn handed over the guidance of the AMC 12 to Prof. Bernardo Abrego of California State University. David Wells maintained the already high standards of the AMC 12 with his contribution of both easy and difficult problems as well as an excellent eye for editorial development of problems statements and solutions. We thank all of these committee chairs for their time, knowledge and heart in the creation of the AMC contests.

### **XII. CONTRIBUTIONS OF THE UNIVERSITY OF NEBRASKA**

The operational location of the AMC has been at the University of Nebraska-Lincoln (UN-L) since 1970. The CAMC is grateful to Chancellor Harvey Perlman, Dean David Manderscheid, and Prof. John Meakin in the UN-L Department of Mathematics, for their support.

## MESSAGE FROM THE CAMC CHAIR

On behalf of the Mathematical Association of America's Committee on American Mathematics Competitions, I want to thank the schools and teachers who took the time to administer the 2008 American Mathematics Contest 10 (AMC 10) and the 2008 American Mathematics Contest 12 (AMC 12). This year marked the 59th year that the American Mathematics Competitions have provided high quality mathematical competitions for United States high school students and for secondary students around the globe.

Many people work hard to make these exams possible. These include the State Contest Directors who make sure schools in their regions know about the exams; the outstanding staff in Lincoln, responsible for registration, printing, distributing, and scoring the exams, and communicating results; and the members of the AMC 10/12 Committee and AMC Advisory Panel who spend long hours composing problems, writing and rewriting problem statements and solutions, and monitoring the difficulty level of the exam. Special thanks are due Dr. LeRoy Wenstrom, the AMC 10 Chair, and Prof. David Wells the AMC 12 Chair, who coordinate the exam creation efforts. I also want to thank the students for giving up part of their day to participate in the AMC 10 or the AMC 12.

Many of the AMC 10 and AMC 12 participants did well enough to qualify for the American Invitational Mathematics Examination (AIME) and a small number of AIME students then qualified for the United States of America Mathematical Olympiad (USAMO). Although these exams are given to fewer students than participate in the AMC 10/12, the committees that create these exams work just as hard as the AMC 10/12 Committees. Thanks to Mr. Steven Blasberg, the AIME Chair, and Prof. Cecil Rousseau, the USAMO Chair, for their efforts in coordinating the creation of high quality exams.

The mission of the CAMC is to promote interest in mathematics among K-12 students and to identify mathematically talented students through a series of mathematical exams. Thus, although the exams are designed to expose students to important mathematical ideas and give students a valuable problem solving experience, it is even more important that students find the exams challenging and fun. We hope that students enjoy not only taking the exams, but also preparing for the exams with teachers and other students, and discussing the answers and different solutions afterwards.

But the exams serve another purpose as well. Many of the AMC brochures and posters display the phrase "Make Mathematical History." The reason for studying mathematics in school is not just to learn how to do the problems in a textbook. A second purpose is to learn techniques and gain the confidence to tackle new or unfamiliar problems, to explore new areas...to make mathematical history in a sense. Many of our exam questions are designed to give students a chance to try their hand at problems that require them to apply their classroom knowledge in new situations and in different ways. And although students may not always succeed in such situations, they can grow mathematically by trying to solve such problems, and from follow up discussions after the exam.

We are always interested in ideas to help us better carry out our mission. The mathematics teachers in the schools are one of our most valued sources of ideas. We welcome any ideas you have that will help us to improve the AMC 10 and AMC 12 and help us to reach more students. In addition we have a great need for high school teachers on the AMC Advisory Panel. If you are interested in contributing to our contests please contact me [ehjohnst@iastate.edu](mailto:ehjohnst@iastate.edu), or visit the American Mathematics Competitions booth at next year's NCTM meeting in Washington, D.C.

# MESSAGE FROM THE AMC 10 CHAIR

The AMC 10 test was developed to provide a better experience in mathematical problem solving for students in the lower high school grades. In years prior to 2000, students in these grades had to take a test that included problems on topics such as logarithms and trigonometry, subjects that they had not yet studied. The AMC 10 examination contains only problems based on subject material that students in ninth and tenth grade have likely seen, while still providing them with a challenging experience.

Our goal for the AMC 10 has been to design the contests so that the average student can work on between 15 and 20 problems and get at least 10 of those correct. This would give an average score of between 72.5 and 85, since a student receives 6 points for each correct problem and 1.5 points for each unanswered problem.

The AMC 10 and AMC 12 tests have common problems, which has the advantage of permitting students taking the AMC 10 to compare their solutions with the students taking the AMC 12, and allows teachers to better identify excellent problem solvers at a young age. However, we are concerned that if we predictably have a large number of common problems on the exams, it might encourage younger students to take the AMC 12 before they are ready, since a larger proportion of students taking the AMC 12 qualify for the American Invitational Mathematics Examination (AIME). As a consequence, you will likely see an unpredictable fluctuation in the number of common problems from a minimum of about nine to a maximum of about thirteen.

A new policy for AIME qualifying was introduced beginning with the 2000 AMC examinations. Those students taking the AMC 12 and scoring over 100 qualify, as usual, as do those students scoring in the top 5% on the AMC 12 examination. This new policy is more equitable since it guards against the possibility of a particularly difficult examination, one on which the scores are uniformly lower than normal, skewing the number of AIME qualifiers.

Beginning with the 2004 contest we instituted a similar qualifying system for the students taking the AMC 10 contests. Students scoring in the top 1% of either AMC10 qualify for the AIME, as well as all those who score 120 or more on one of these contests. The requirement is set higher for AMC 10 qualifiers for two reasons:

- First, the AIME can be quite intimidating, and we do not want young students to be discouraged by poor performance on this examination.
- Second, we would like to ensure that any student qualifying for the AIME by virtue of placement on the AMC 10 would likely also qualify for the AIME in subsequent years when taking the AMC 12.

It could be very disappointing for a student to be an AIME qualifier in grade 10 but not in subsequent high school years. By restricting the number of AIME qualifiers from the AMC 10 to about the top 1%, we hope not to exclude any very good young students for whom the AIME would be an appropriate experience, but also not put students in a situation where they do not have much opportunity to succeed.

The AMC will continue to try to improve the experience of students taking the AMC, but the way in which we will do so depends significantly on the feedback that we receive from teachers giving the examinations and from students taking them. Please send any comments you have with regard to the AMC 10 examination to LeRoy Wenstrom (lwenstrom@gmail.com) or Elgin Johnston, the AMC Chair (ehjohnst@iastate.edu).

## MESSAGE FROM THE AMC 12 CHAIR

Since I assumed the position of AMC 12 Chair in 2001, the contest has undergone several significant structural changes. These include the creation of alternate forms of the contest, two revisions of the scoring system, and most recently the elimination of calculators on all contests beginning in 2008. Although it is too soon to draw any firm conclusions, the conversion to a calculator-free format does not appear to have had any adverse effects on student performance. The 2008 contests contained relatively few problems that would previously been rendered trivial by calculators, but it is hoped that future contests will take better advantage of the new format.

I have continued to monitor the effects of the most recent revision of the scoring, which reduced the credit for a blank response from 2.5 to 1.5 points in the hope that students would be encouraged to attempt more problems. In the two years since the change was instituted, students have attempted an average of 1 to 2 more problems than in the immediately preceding years. At the same time the average score has declined to an unweighted average of 68.6 for the four AMC 12 contests over the past two years, down from 78.5 for the years 2002-2005. (The average score in 2006 was an abnormally high 85.6.) We have had limited success in attempting to counterbalance the effect of the scoring change by providing more accessible low-end problems. However, the average number of problems solved successfully has remained fairly constant over the past several years. I suspect that most students measure their enjoyment of the

## Message from the AMC 12 Chair, continued

contest in terms of problems solved, or even problems grappled with, rather than in terms of a raw score.

Because this will be my final report to you as AMC 12 Chair, I would like to take a final opportunity to comment on what I believe the contest should be and on the degree to which my vision matches the reality of the results. My primary wish is that all students should enjoy the contest and should walk away from it with the feeling of having had a successful problem-solving experience. For many students, the contest lives in the first ten problems, so we attempt to ensure that those initial problems are accessible without relying heavily on cookie-cutter techniques that can be applied with little thought. This continues to be a challenge to all who are involved in creating the contests. The average number of correct responses to the first ten problems was 6.13 on the 2008 12 A contest and 6.87 on the 2008 12 B, higher than the corresponding numbers from several years ago, but still a bit lower than we would like.

The role of the contest in identifying qualifiers for the AIME places several demands on it, perhaps none more important than consistency in difficulty from year to year and between the two forms given in the same year. Consistency between the 12 A and 12 B contests has been achieved with varying degrees of success during my tenure as Chair, with 2008 being a reasonably good year. The average scores on the two forms were 65.6 and 68.9, respectively, and the AIME qualifying score was 97.5 for both forms. The high-end difficulty level of the 2008 contests closely matched that of the 2007 contests. The percentage of AIME qualifiers was 7.0% of all contestants in 2008 and 7.6% in 2007. The number of perfect scores was 25 in 2008 and 26 in 2007.

I have recently completed the process of handing over my responsibilities to my successor as AMC 12 Chair, Bernardo Abrego. Bernardo has been a valued member of the AMC 12 Committee, on which his wife, Silvia Fernandez, also serves. He has assumed his new duties with an enthusiasm that reassures me that the contest will improve and grow under his leadership. Before stepping down, I would like to express my appreciation to the AMC 10 Chairs I have worked with, Doug Faires and LeRoy Wenstrom, for their wisdom and good humor that helped make a potentially difficult job enjoyable. Thanks are also due to CAMC Chair Elgin Johnston and his predecessor, Dick Gibbs; to the present and former members of the AMC 12 Committee with whom I've served; to the many problem posers, draft and packet reviewers and galley readers whose largely anonymous work is an essential contribution to the contests; to AMC Director Steve Dunbar and the staff at the AMC office; and to all of you whose participation and support makes the contests possible.

I will be remaining active with the contests in a new role, succeeding Elgin Johnston as CAMC Chair. His capable leadership over the past six years make him a difficult act to follow, but I welcome all questions, suggestions, bouquets or brickbats from you. You may send correspondence to the address below or contact me by email (dmw8@psu.edu) or phone (724-334-6749 office, 412-486-9478 home).

# QUOTATIONS

## CALIFORNIA

Thank you so much for taking him under your wings. . . I noticed how happy he was in DC being around all the math people. I have never seen him smile so brightly as he did in DC. Yes, we are very, very proud of him and definitely excited about the China-Vietnam trip. He claims he is excited, although you really wouldn't be able to tell.

*and*

Thanks to your support, my son seems to have successfully finished MOSP this year . . . he mentions that the camp was really good and he learned a lot. And he says even more, that it was really exciting to get to know many friends and teachers who love math and he hopes to join the camp again next year.

## COLORADO

Thank you for your donation of the copies of Mathematics Magazine . . . My favorite part of these magazines is the incredible variety of presentations given. From an interview with Isaac Newton to a presentation of an interesting example of the incredible variations a single constant of integration can have, these articles stick in my mind as what math is like in the real world. I look forward to pursuing a math major in the next four years, and the magazine you donated allows me to see into the future a little bit.

## MICHIGAN

As an AMC 12 regional winner, I was pleasantly suprised to receive the beautiful book "First Steps for Math Olympians," comprised of wonderful contest preparation materials. . . It is through support from donors like you that the AMC contests are

made stronger. They reach more high school and middle students like me and make our math education much more enjoyable.

### NEW JERSEY

We greatly appreciate the opportunity for our students to participate in such prestigious and challenging competitions like the AMC and the USAMO. Through this level of competition and rigor our students grow.

### NEW YORK

On behalf of the students of Stuyvesant High School and the faculty of the mathematics department, I would like to thank you for donating the bronze cup for the 2007 AMC. The AMC has long been a tradition here at Stuyvesant, and this exam is responsible for generating a buzz among the students and the math team coaches. Many of your problems are developed into lessons and math research papers. As a contest writer myself, I can appreciate the challenges that you face generating a meaningful and interesting contest year after year. My hat is off to you!

### NORTH CAROLINA

...I would also like to thank you and all the AMC staff for making such a wonderful contribution to the math community and especially for MOSP. I truly appreciate your work.

### WASHINGTON

(My son's) life has been so enriched by his participation in the AMC contests and attendance at MOSP during his high school years. The contacts and friends he's made there are invaluable. Thanks so much for your role in that!

## AMC 10 B /12 B PARTICIPATING INSTITUTIONS OF HIGHER EDUCATION

During the 2007-2008 school year we again offered the High School Contests through colleges and universities across the nation, through their Mathematical Association of America members, asking them to offer the AMC 10 B/12 B to high school students in their area who did not have the contests offered in their own schools. We were very pleased with the results. We had participation from 36 institutions.

# EDYTH MAY SLIFFE AWARDS

## DISTINGUISHED HIGH SCHOOL MATHEMATICS TEACHING

The twentieth set of winners of the Edyth May Sliffe Awards for Distinguished High School Mathematics Teaching was announced following the analysis of the 2008 American Mathematics Contest 12 (AMC 12). The twenty-three winners are listed on the next two pages. The award recipients were selected from nominations received from the top three students of each of the 60 highest scoring teams on the AMC 12. These students were asked to recommend a teacher who in their opinion was most responsible for their success on the AMC 12.

These awards are the result of a bequest made to the Mathematical Association of America (MAA) by Edyth May Sliffe, a retired high school teacher of mathematics at Emeryville, California. She made this bequest for the purpose of giving awards to high school mathematics teachers whose teams have done well on the AMC 12. Edyth Sliffe wanted to do this because her students had always done very well on the AMC 12 and received various honors, but she as a teacher had never received any recognition. She had always felt that such teachers should receive some awards.

In addition to a cash prize the award winning teachers receive: a letter of congratulations from the President of the MAA; a certificate signed by the President of the MAA, the Chair of the Committee on the AMC 12, and the Director of the American Mathematics Competitions; a Sliffe pin; a complimentary one-year MAA membership; and a complimentary one-year NCTM (National Council of Teachers of Mathematics) membership. Whenever possible these awards are presented to the winners during an award ceremony arranged by their school administrators.

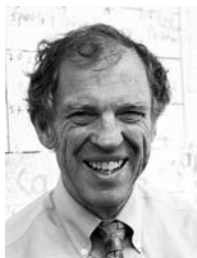

This Award serves as an excellent illustration of how a single person, in this case Edyth May Sliffe, can have a substantial positive influence nationwide by taking a decisive action to further a cause he or she strongly believes.

# AMERICAN MATHEMATICS COMPETITION 8

The 23<sup>rd</sup> Annual American Mathematics Contest 8 (AMC 8) was held on Tuesday, November 13, 2007, and it continued to be received with enthusiasm and support by an overwhelming number of schools, administrators, teachers and students. A total of 172,090 students from 2,359 schools registered for the examination.

The AMC 8 will continue to be a 25-question, 40-minute multiple choice exam that may be given during a regular mathematics class period. The Committee on the American Mathematics Competitions has decided they will no longer allow the use of calculators starting in the year 2008. This means that the last year calculators will be allowed on the AMC 8 was in 2007. As usual, no problems on the test will require the use of a calculator. The nature of the questions will not change from past tests. High scoring students on the 2008 AMC 8 will be invited to participate in the 2009 AMC 10 A & B and/or AMC 12 A & B which are scheduled for TUESDAY, February 10, 2009 and/or WEDNESDAY, February 25, 2009.

Since the AMC 8 was centrally scored at the Office of the Director it was possible to obtain an enormous amount of data. Please note that the word “recorded” used below should be interpreted as indicating that the results are based on only the items that were mark sensed by the students. Some of the students failed to mark all items such as their grade and sex. The following represents some of the statistics relating to the examination:

**TABLE III: 2007 AMC 8 NATIONAL STATISTICS**

Number of Answer Forms received - .....	150,618
Number of schools sending in reports - .....	2,260
Number of students scoring 25 (a perfect paper) -.....	129
National student average - .....	9.87
Number of recorded female participants - .....	69,859
Number of recorded male participants - .....	77,709
Average of recorded female participants - .....	9.28
Average of recorded male participants - .....	10.42

**Grade level average:**

Grade	Number recorded	Average
≤5	3,170	8.48
6	18,687	8.19
7	49,594	9.51
8	76,907	10.60

Information regarding the implementation of the AMC 8 may be obtained from the American Mathematics Competitions at 800-527-3690 or on the AMC web site at: <http://www.unl.edu/amc>. More information on the 2007 AMC 8 is available on our web site: <http://www.unl.edu/amc/>.

# NATIONAL SCHOOL AWARDS

## COMMITTEE AND DONOR AWARD DESCRIPTIONS

In each of the eleven regions into which the United States and Canada are divided, the five schools with the highest team scores (sum of the highest three scores by participants) are recognized by Donor or Committee Awards.

This year Institutions of Higher Education participated in our AMC 10B/12B, offering supplemental contest sites for area students. Institutions do not qualify for these Awards, but are mentioned here for recognition (*marked with \**) when they placed in the top echelon.

- A. **Charles T. Salkind Memorial Silver Cup** — This silver cup, donated by the L.G. Balfour Company, Attleboro, MA, is awarded to the school with the highest team score (in any region).
- B. **William H. Fagerstrom Memorial Silver Cup** — This silver cup is awarded to the school with the second highest team score (in any region) and it is provided by the L.G. Balfour Company, Attleboro, MA.
- C. **Committee Bronze Cups** — In each of the regions in which a silver cup is not awarded the Committee on the American Mathematics Competitions provides a Bronze Cup to the school with the highest team score.

## SCHOOLS NOT RECEIVING A CUP ARE ELIGIBLE FOR THESE AWARDS

- D. **CAMC Mathematics Books\*** — In each of the eleven regions, five books are donated by the Committee on the American Mathematics Competitions to one school having a high team score.
- E. **W. H. Freeman Books\*** — In each of the eleven regions, a set of books, donated by W.H. Freeman and Company, San Francisco is awarded to one school having a high team score.
- F. **Mathematics Magazine\*** — In each of the eleven regions, a one-year subscription is donated by the Committee on the American Mathematics Competitions to one or more schools having a high team score.
- G. **Pedagogy Award** -- Awarded to one school in each of the 50 states, US Territories, Military Schools abroad, and Canada with the “Most Improved” Team Score on the AMC 10, and AMC 12.

## INTRAMURAL AWARDS

- 1. **Certificate of Honor** — This is awarded to schools with a team score of 400 or greater.
- 2. **Certificate of Merit** — This is awarded to schools with a team score of 300-399.

*\* Distribution of awards is arranged so that schools do not receive duplicates of awards made to them in prior years.*

# STUDENT DISTINGUISHED HONOR ROLL

## INTERNATIONAL

### AMC 10 A&B

The AMC 10 A&B International Student Distinguished Honor Roll includes participants from International Schools who score 127.5 or above on the AMC 10 A or 127.5 or above on the AMC 10 B. It is based on 1% of the top scoring students. An Honor Roll Pin and a certificate are awarded to these contestants. The listing is by individual score in each region.

# AIME - AMERICAN INVITATIONAL MATHEMATICS EXAMINATION

## MESSAGE FROM THE AIME CHAIR

Congratulations to all of those who qualified to participate in the AIME.

The AIME has many goals, the foremost of which (and the reason for its creation) is to select students for participation in the USA Math Olympiad. The AIME has, however, other equally-important goals. One of these is to provide a transition between the problems of the AMC 10/12 exams, which often involve speed and rapid recall of mathematical techniques and formulae, and the problems of the USAMO, which most often demand creativity and insight. The extended time limit on the AIME provides the AIME committee with an opportunity to create a contest with a blend of these two approaches.

Another goal of the AIME is to provide students with mathematically rigorous and elegant solutions to the problems. The committee generally spends the large majority of its time preparing the solutions, not the problems. The AIME Committee feels that it is important that AIME solutions are models of stylistically correct mathematical exposition, especially since this is the first exposure many younger students have to mathematical writing.

One goal of the committee in constructing the exam is to provide problems accessible to a wide range of students. The committee always seeks to include on the exam problems which can be solved by both direct but time-consuming methods and also insightful, creative (and short) methods. The committee hopes that even students who have found solutions to AIME problems will consult the solutions manual for alternative and often surprising solutions.

Thanks to all those who have contributed their time and effort to creating and reviewing problems for the AIME. In particular, thanks go to the members of the AIME Committee: Jacek Fabrykowski, Chris Jeuell, Jonathan Kane, John Lawlor (outgoing), and Bruce Reznick. Thank you too to the staff in Lincoln who provide such wonderful support in the production of the contest.

Mr. Steven Blasberg  
West Valley College

# U.S.A. MATHEMATICAL OLYMPIAD

## MESSAGE FROM THE USAMO CHAIR

I join the members of the USAMO Committee (Zuming Feng, Gregory Galperin, Razvan Gelca, Kiran Kedlaya, Richard Stong, Zoran Sunik) and ex-officio members (Steven Blasberg, Steven Dunbar, Elgin Johnston, David Wells) in extending hearty congratulations to all who participated in the 2008 USAMO and encouragement to those who look forward to taking part next year.

In its current form, the USAMO is patterned after the IMO (International Mathematical Olympiad) in that it is given over a two day period and consists of six problems, each worth 7 points. Also, the range of subjects covered is basically the same as at the IMO. These include algebra, combinatorics, geometry, inequalities, number theory, and blendings of these topics, for example combinatorial geometry. The committee makes every effort to choose engaging and original problems.

In addition to members of the committee, there are panelists – many of whom are former USAMO winners – who contribute and evaluate problems. Finally, the AMC staff makes sure that the whole contest operation runs smoothly. Thanks to all concerned.

## AKAMAI FOUNDATION SCHOLARSHIPS

For the past seven years, the Akamai Foundation, dedicated to fostering excellence in math education in the United States (grades K-12) has been an ardent supporter of the Mathematical Association of America (MAA). The Foundation was established in 2000 by Akamai Technologies, Inc., the leading global service provider for accelerating content and business processes online, and is funded solely by Akamai executives, its employees and individuals outside the company. This year the Akamai grant is being used to fund two very important initiatives. One of these initiatives is the allocation of \$45,000 to fund the Akamai Foundation Scholarships. These scholarships are given to the three high school students who have the top scores in the 2008 USAMO. College scholarships of \$10,000, \$7,500, and \$5,000 were awarded by the Foundation at the 37<sup>th</sup> Annual USAMO Awards Ceremonies held on June 8-9, 2008.

### CLAY MATHEMATICS AWARD

Evan O'Dorney, a home schooled 9th grader in Danville, CA, and a member of the Berkeley Math Circle, is this year's recipient of the Clay Olympiad Scholar Award, which is given to the individual that presented the "most creative" solution to an Olympiad problem. His prize consists of a plaque and a cash award. His school also receives a cash award.

Evan is pictured here with Dr. Dave Ellwood, Research Director of the Clay Mathematics Institute.

### BALLES USAMO WINNER AWARDS

Robert P. Balles is a lifelong student of mathematics, former community college instructor, and retired businessman. He is an alumnus of Fordham University, Harvard University, and California State University.

He has established an endowed award that each year will honor the USAMO winning students with a \$500 Series I U.S. Savings Bond.

# MATHEMATICAL OLYMPIAD SUMMER PROGRAM

## MESSAGE FROM THE MOSP AND IMO CHAIR

### 2007 IMO

The 2007 USA team members for the IMO were chosen according to their combined performance on the 37th annual USAMO and the Team Selection Test held in Washington, D.C. on May 22 and 23, 2007. Members of the USA team at the 2007 IMO (Hanoi, Vietnam) were Sherry Gong, Eric Larson, Brian Lawrence, Tedrick Leung, Arnab Tripathy, and Alex Zhai. Zuming Feng (Phillips Exeter Academy) and Ian Le served as team leader and deputy leader, respectively. The team was also accompanied by Steven Dunbar (University of Nebraska-Lincoln), as the observer of the deputy leader. The Mathematical Olympiad Summer Program (MOSP) was held at the University of Nebraska-Lincoln, June 10 - June 30, 2007.

There were 526 contestants from 94 countries and regions in the 2007 IMO. This is a very challenging contest, in particular for stronger students, because the last problem in each session (problem 3 and 6) is very difficult. (There were only 7 complete solutions submitted to these two problems.) The top three contestants are Konstantin Matveev from Russia (37 points), Peter Scholze from Germany and Caili Shen from China (36 points). Gold medals were awarded to students scoring between 29 and 37 points, silver medals to students scoring between 21 and 28 points, and bronze medals to students scoring between 14 and 20 points. There were 39 gold medalists, 83 silver medalists, 131 bronze medalists, and 149 honorable mentions (awarding to non-medalists solving at least one problem completely). Gong and Zhai's 32 tied for 7th place overall. The team's individual performances were as follows:

Gong	- GOLD Medallist	Larson	- SILVER Medallist
Lawrence	- SILVER Medallist	Leung	- BRONZE Medallist
Tripathy	- SILVER Medallist	Zhai	- GOLD Medallist

In terms of total score (out of a maximum of 252), the highest ranking of the 94 participating teams were as follows:

Russia 184	S. Korea 168	Ukraine 154	Taiwan 149
China 181	USA 155	N. Korea 151	Romania 146
Vietnam 168	Japan 154	Bulgaria 149	Iran 143

### 2003-2007 CUMULATIVE IMO RESULTS

In terms of total scores (out of a maximum of 1260 points for the last five years), the highest ranking of the participating IMO teams is as follows:

China 1061	Vietnam 810	Hungary 747	Turkey 622
Russia 942	Romania 808	Ukraine 741	Hong Kong (Ch.) 621
USA 922	Japan 801	Germany 694	Moldova 616
S. Korea 861	Taiwan (Ch.) 779	United Kingdom 633	Poland 604
Bulgaria 859	Iran 779	Belarus 631	Canada 604

More and more countries now value the crucial role of meaningful problem solving in mathematics education. The competition is getting tougher and tougher. A top ten finish is no longer a given for the traditional powerhouses.

### 2008 IMO

This year the IMO will be held in Madrid, Spain, July 10 - 22, 2008. The 2008 USA team members for the IMO were chosen according to their combined performance on the 37th annual USAMO, parts 1 and 2 of the Team Selection Test held in Washington, D.C. on June 8-9, 2008, and part 3 of the Team Test while at MOSP on June 13th. Members of the USA team at the 2008 IMO for Madrid are: Paul Christiano, The Harker School,

### CHINESE GIRLS MATH OLYMPIAD -- CGMO

#### 2007 CGMO

In 2007, the USA sent a team of eight girls to the 6th Girls Math Olympiad in Wuhan, China, August 11-16, 2007. The Girls Math Olympiad originated in China in 2001 as a Chinese regional competition, and has expanded since then to include participants from other countries, first from eastern Asia (including Russia), and later to participants from each continent. This was the first year that the USA sent a team to the Girls Math Olympiad.

The team members were chosen based on their score on the 2006 USA Math Olympiad. The USA team consisted of Sway Chen, Sherry Gong, Wendy Hou, Jennifer Iglesias, Colleen Lee, Patricia Li, Marianna Mao, and Wendy Mu.

The China Girls Math Olympiad is a challenging competition with a structure similar to that of the USAMO and IMO: this year, the problems were particularly difficult. The medals earned were

Gong – GOLD medal

Hou – SILVER medal

Li – BRONZE medal

Mao – BRONZE medal

Mu – BRONZE medal.

Sherry Gong also tied for first place in the competition.

#### 2008 CGMO

In 2008, the United States will for a second time send a team of eight girls to the Girls Math Olympiad, which this be held on August 13-18 in Zhongshan, China. Twelve girls were selected based on their score on the 2008 USA Math Olympiad to be trained at the Math Olympiad Summer Program (MOSP) from June 8-July 2, 2008: they are In Young Cho, Qian (Amy) Huang, Jennifer Iglesias, Ning (Jenny) Jin, Carolyn Kim, Colleen Lee, Wendy Mu, Katherine Rudolph, Elizabeth Synge, Iris Xu, Lynnelle Ye, and Shijie (Joy) Zheng. The eight girls on the team going to the Girls Math Olympiad are In Young Cho, Jennifer Iglesias, Ning (Jenny) Jin, Carolyn Kim, Colleen Lee, Wendy Mu, Lynnelle Ye, and Shijie (Joy) Zheng.

# MATHEMATICAL OLYMPIAD SUMMER PROGRAM PARTICIPANTS

This year's Mathematical Olympiad Summer Program (MOSP) will be held on the campus of the University of Nebraska-Lincoln June 10-July 3, 2008. Students will be treated to classes on advanced mathematical topics, special guest speakers, mathematical contest training, and related social and mathematical activities.

# 2007 INTERNATIONAL MATHEMATICAL OLYMPIAD

*2007 U.S.A. International Mathematical Olympiad Team*

With their medals, from left: Sherry Gong, Tedrick Leung, Arnav Tripathy, Alex Zhai, Brian Lawrence and Eric Larson.

The 48<sup>th</sup> International Mathematical Olympiad (IMO) was held July 19 - July 31, 2007 in Hanoi, Vietnam. The International Mathematical Olympiad (IMO) is the pre-eminent mathematical competition for high-school age students from around the world. The IMO consists of solving 6 extremely challenging mathematical problems in a 9-hour competition administered over two days. More information about the 48<sup>th</sup> International Mathematical Olympiad is at: <http://imo2006.dmfa.si/>

The six USA team members won 2 Gold medals, 3 Silver medals and 1 Bronze. The USA team ranked 5<sup>th</sup> among all 93 participating countries.

- \* Sherry Gong, Gold Medal; graduate of Philips Exeter Academy, Exeter NH, and from Puerto Rico
- \* Eric Larson, Silver Medal; junior at South Eugene High School, Eugene, OR
- \* Brian Lawrence, Silver Medal; a graduate of Montgomery Blair High School, Silver Spring, MD
- \* Tedrick Leung, Bronze Medal; graduate of North Hollywood High School, Hollywood, CA
- \* Arnav Tripathy, Silver medal; graduate of East Chapel Hill High School, Chapel Hill, NC
- \* Alex Zhai, Gold medal; senior at University Laboratory HS, Urbana, IL

At the IMO, the USA team has consistently finished in the top five for the last eight years. At this year's IMO over 500 young mathematicians from 93 countries competed in solving problems posed in a two-day test, administered on July 25 and July 26. Overall, the IMO awarded 39 gold medals, 83 silver and 131 bronze medals.

## BALLES TEAM AWARDS

Robert P. Balles has established an award that will honor the student participants in the annual International Mathematical Olympiad (IMO) with a \$1,000 Series I U.S. Savings Bond. Each Series I U.S. Savings Bond features a prominent American who has contributed to the history of the country. Appropriately, this particular denomination features Albert Einstein.

The MAA gratefully thanks Mr. Balles for his generosity in the recognition of the six extraordinary student mathematicians who compete annually on behalf of this country against the rest of the world's student mathematical power. The IMO Team for 2008 is: **Paul Christiano**, The Harker School, Saratoga, CA, **Shaunak Kishore**, Unionville-Chaddsford High School, West Chester, PA, **Evan O'Dorney**, Berkeley Math Circle, Danville, CA, **Colin Sandon**, Essex High School, Essex Junction, VT, **Krishanu Sankar**, Horace Mann High School, Hastings On Hudson, NY, and **Alex Zhai**, Univ. Laboratory High School, Champaign, IL.
