REPORT OF THE DIRECTOR

STEVEN DUNBAR

I. INTRODUCTION

I am extremely pleased to announce that this year over 220,000 students enrolled in the 60th annual AMC 12 contests and 10th annual AMC 10. A multitude of positive comments received from teachers once again confirmed that the Committee created examinations which were both exciting and challenging. Congratulations to all of you for continuing to recognize the fact the AMC 10 and 12 play a complementary role in supporting the mathematics curriculum at the high school level.

This summary includes a listing of results and awards associated with this year's AMC 10, AMC 12, AIME and USAMO.

II. 2009 ENROLLMENT ANALYSIS AND STATISTICAL RESULTS

Our outstanding AMC Lincoln office staffers were once again able to process and mail the results and awards in an efficient manner. The results for schools with American Invitational Mathematics Examination qualifiers were mailed in less than two weeks following the exam, and all other results were mailed during the following week. This is rather remarkable when one considers the extensive checks which are necessary to ensure the accuracy of the results.

We continue to send an ever increasing pool of contest managers their schools' results by email. If you are able to communicate via email and wish to be added to our database, please send a message to "amcinfo@maa.org" as soon as possible.

In addition to the results and awards of the AMC 10/12, this summary contains an analysis of the results of the 2008 American Mathematics Contest 8 (AMC 8) as well as the 2009 American Invitational Mathematics Examination and the 2009 USA Mathematical Olympiad.

Once again, the AMC 10 and AMC 12 were available in French, Spanish, Braille and Large Print.

III. INTERNATIONAL PARTICIPATION

I am pleased to report that the exam was administered in Puerto Rico, Guam, the Mariana Islands, many USA embassy and military schools, and individual International schools. We thank the teachers abroad who provide an opportunity for students at US military bases and embassies, as well as other international schools, to participate in the AMC 10/12.

The CAMC extends its appreciation to Professor Paul Charlebois who translates the exams into French for students in Canada. We are also grateful to Professors Maria de Losada and Mario Cruz from Bogota, Colombia for translating the AMC 10 and AMC 12 into Spanish for use in Puerto Rico as well as in the USA and Colombia. Special thanks to Professor Peter Shiue for translating the exams into Chinese for more than 176 schools in Taiwan.

IV. 2010 CONTEST DATES, REGISTRATION AND FEES

There will again be two official dates for the AMC 10 & AMC 12. Contest A will be held on the second Tuesday in February (February 9, 2010), Contest B will be given 15 days later, Wednesday, February 24, 2010. All rules and awards apply to both tests for all schools and students. Students will be allowed to take the exam booklets home

with them the day of the contest.

The Registration cost for the 2009-2010 year has been kept the same as in the 2008-2009 season. We have again included the shipping cost in with the Registration Fee. Registration plus shipping for the AMC A Contests is \$40 per school, if you register by December 18, 2009. However, although one bundle of ten AMC 12 exams will continue to be \$16, one bundle of ten AMC 10 exams will increase to \$16. There will be an extra \$10.00 charge included with the Registration for the second contest (B) to cover 2-day shipping. Contest B will be shipped on February 9, 2010, the day of Contest A.

The Committee on the American Mathematics Competitions has continued its decision against the use of calculators on the 2010 AMC 10 and AMC 12. No problems on the test will require the use of a calculator. The nature of the questions will not change from past tests.

Materials for Contest A will be mailed in January of 2010. Please register by December 18, 2009 if possible. Completion of your registration as early as possible will be greatly appreciated by our office staff.

If you do not receive one of our many fall mailings, a current registration form will be available on our Web site. Please check on-line at: <http://www.unl.edu/amc>

V. NASSP'S SANCTION

The National Association of Secondary School Principals has placed this program on the NASSP National Advisory List of Contests and Activities for 2009-2010.

VI. THE 2009 AIME

A total of 10,029 students officially participated in the American Invitational Mathematics Examination (AIME) which was held on Tuesday March 17, 2009 or the "alternate" date, Wednesday, April 1, 2009. The comparable figure in 2008 was 8,584 students. This year, the mean score on the AIME I was 3.91, and on the AIME II was 4.17, versus 4.77 on the AIME I, and 5.27, on the AIME II, in 2008. A list of the students with a score of at least 6 on the 2009 AIME is found in this summary.

The 2010 AIME is scheduled for Tuesday, March 16, 2010 and the alternate date is Wednesday, March 31, 2010. To qualify for the AIME in the year 2010 a student must score 100 or more or be in the top 5% on the AMC 12 or score 120 or more or be in the top 1% of the AMC 10 participants. The AIME consists of 15 questions with integer answers. A student's score is the number of correct answers. There is no partial credit. The time allowed is 3 hours.

VII. THE USAMO

The USA Mathematical Olympiad (USAMO) was held on April 28-29, 2009 in each respective student's school. 521 students were invited to participate this year. This is more than double the number who were invited to participate a few years ago because we again received a grant from the Art of Problem Solving to cover the costs associated with the additional number of students. All of the participants were chosen based on the selection criteria published in the AMC 10/12 and AIME Teachers' Manuals. This summary contains a list of those participants as well as names of the USAMO Winners and those students who achieved Honorable Mention.

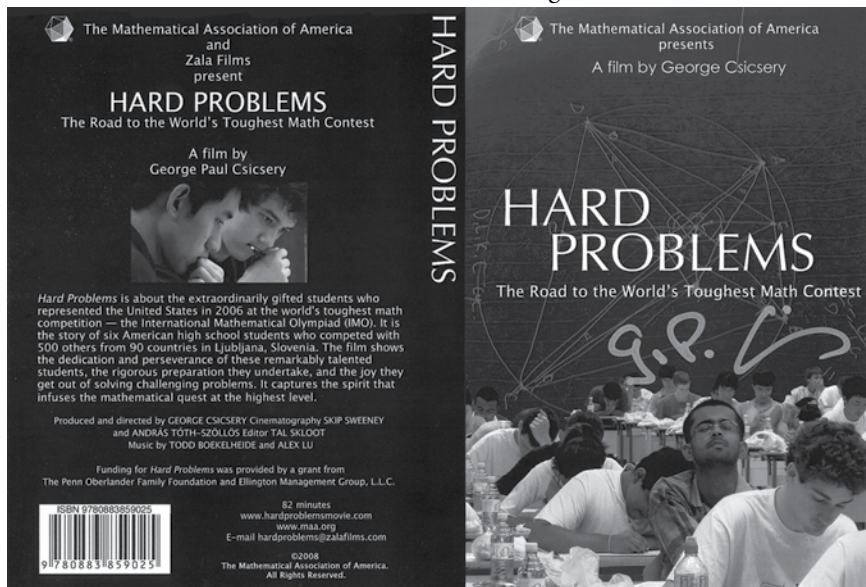

The USAMO was once again administered over two days (4.5 hours each day). All papers were graded by the USAMO Committee and by Mathematical Olympiad Summer Program staff members on May 9th, 10th and 11th. We are grateful to these mathematicians for their excellent work associated with this important task.

Report of the Director, Continued

The top twelve USAMO students were honored in Washington, DC June 8, 2009 with elaborate ceremonies held at the headquarters of the Mathematical Association of America (MAA) and the U.S. Department of State Building by invitation of the Director for Science, Office of Science and Technology Policy, Executive Office of the President, Dr. John Holdren. The team for the 2009 International Mathematical Olympiad (IMO) to be held in Bremen, Germany, in July is: John Berman, John T. Hoggard HS, Wilmington, NC; Wenyu Cao, Phillips Academy, Andover, MA; Eric Larson, South Eugene HS, Eugene, OR; Delong Meng, Baton Rouge Magnet HS, Hattiesburg, MS; Qinxuan Pan, T.S. Wootton HS, Rockville, MD; Evan O'Dorney, Venture Academy, Danville, CA.

VIII. DOCUMENTARY FILM - HARD PROBLEMS

In 2005 MAA President Joe Gallian secured a grant from Larry Penn, who was on the US Math Olympiad Team in the late 1970s, to fund a documentary film about the students in the USAMO, and the USA team at the 2006 International Math Olympiad. Larry Penn is now a partner in the investment firm Ellington Management Group. The director is George Csicsery. He produced an award winning film on the mathematician Paul Erdos and just finished a film about the American mathematician Julia Robinson. The documentary film is now finished and the Deluxe Edition DVD is available from the MAA Bookstore at www.maa.org.

IX. ACKNOWLEDGEMENT

The Committee acknowledges the contributions of many individuals and organizations for their assistance. We are indebted to the State and Canadian Provincial AMC Directors who provide assistance with the implementation of the AMC 10/12. Their tasks include contacting schools so that every student will have an opportunity to participate in the AMC contests, preparing a state/province summary of results and awards, and presenting awards. The names of the Directors are listed in this Summary.

X. CONTRIBUTIONS OF THE LINCOLN STAFF

The contributions of the AMC Lincoln staff members to the fulfillment of the responsibilities associated with the entire exam process in a 'beyond the call of duty' manner is something to behold. Let us once again applaud AMC staff members Elizabeth Claassen, Marsha Conley, Whitney Emanuel, Sonia Freeman, Rachelle Jensen, Terri McKee, Lynette White, and Shelly Zysset. Our University student helpers are Wen Luo, and Keler Marku. I welcome this opportunity to commend their excellent work.

XI. SPONSORS / CONTRIBUTORS / AMC COMMITTEE MEMBERS

We appreciate the continued support of all of our Sponsors and Contributors. Kudos go to the members of the CAMC, AMC 8, AMC 10, AMC 12, AIME, USAMO Subcommittees and Advisory Panel members who give so much of their time to the formulation of consistent rules of operation and examinations of superior quality. The leadership given by the Chairs of these committees, namely, Prof. David Wells (CAMC Chair), Ms. Bonnie Leitch (AMC 8), Prof. Bernardo M. Ábrego (AMC 12), Dr. LeRoy Wenstrom (AMC 10), Mr. Steven Blasberg (AIME) and Prof. Cecil Rousseau (USAMO) is especially noteworthy.

XII. CONTRIBUTIONS OF THE UNIVERSITY OF NEBRASKA

The operational location of the AMC has been at the University of Nebraska-Lincoln (UN-L) since 1970. The CAMC is grateful to Chancellor Harvey Perlman, Dean

MESSAGE FROM THE CAMC CHAIR

During the past year I was appointed as Chair of the Mathematical Association of America's Committee on the American Mathematics Competitions (CAMC). During my first year of service in that position, I have had many occasions to reflect on the vast number of people who help to maintain these competitions as unique experiences that students enjoy. If you are reading this, you have probably contributed to the success of the 60th annual AMC 10 & 12 Contests. You may be a student who participated in the contest. Perhaps you are a teacher who administered the contest or a State Contest

Director who encouraged all the schools in your state to register for it. You might be a member of the AMC 10/12 Contest Committee or the AMC Advisory Panel, and in that role you might have posed problems for the contest or assisted in the editing at various stages of its construction. I want to extend my heartfelt gratitude to each of you. Thanks are also due to AMC Director Steve Dunbar and his capable and hard-working staff at the AMC office for the registration of contestants, the production, distribution and scoring of the contests, and the communication of the results. Special thanks go to AMC 10 Committee Chair LeRoy Wenstrom and AMC 12 Committee Chair Bernardo Abrego. I also want to acknowledge my predecessor as CAMC Chair, Elgin Johnston, whose record of dedicated service will be difficult to match.

The twofold mission of the CAMC is to promote interest in mathematics among K-12 students and to identify mathematically talented students through a series of mathematical exams. The AMC 10 & 12 contests support the first of those missions by giving students a positive experience with interesting and challenging problems. It is important for students to recognize that although the contests are often referred to as exams, they are not simply assessments of procedural skills. Each contest should be viewed as a sequence of increasingly difficult puzzles, the solutions of which represent increasingly significant accomplishments by the successful contestant. The success of the contest in promoting interest in mathematics can be measured more reliably by the volume of the post-contest discussion among the contestants than by the average score.

The AMC 10 & 12 contests also support the second mission of the CAMC by serving as the initial step in the demanding process through which participants in the American Invitational Mathematics Examination (AIME), the United States of America Mathematical Olympiad (USAMO), and ultimately the International Mathematical Olympiad (IMO) are selected. In addition to identifying talented students, the contests also serve to sharpen their talents. As the AMC Philosophy and Purpose Statement points out, "it is what happens before and after the contests that can have lasting educational value." Students should be encouraged to seek out and utilize printed materials and online resources, as well as their teachers and fellow students, both to prepare for the contests and to analyze and learn from the solutions.

MESSAGE FROM THE CAMC CHAIR, continued

We are always seeking new ideas to help us better carry out our mission. The mathematics teachers in the schools are among our most valuable sources of ideas. We welcome any thoughts you have that will help us improve the AMC 10 & 12, make the exam better fit your needs, and help us reach more students. We also have a critical need for high school teachers on the AMC Advisory Panel. If you are interested in contributing or editing problems for our contests, please contact me at the address below. You can also visit us at the American Mathematics Competitions booth at the annual NCTM meeting, to be held in Washington in 2009 and in San Diego in 2010.

MESSAGE FROM THE AMC 10 CHAIR

The AMC 10 test was developed to provide a better experience in mathematical problem solving for students in the lower high school grades. In years prior to 2000, students in these grades had to take a test that included problems on topics such as logarithms and trigonometry, subjects that they had not yet studied. The AMC 10 examination contains only problems based on subject material that students in ninth and tenth grade have likely seen, while still providing them with a challenging experience.

Our goal for the AMC 10 has been to design the contests so that the average student can work on between 15 and 20 problems and get at least 10 of those correct. This would give an average score of between 72.5 and 85, since a student receives 6 points for each correct problem and 1.5 points for each unanswered problem.

The AMC 10 and AMC 12 tests have common problems, which has the advantage of permitting students taking the AMC 10 to compare their solutions with the students taking the AMC 12, and allows teachers to better identify excellent problem solvers at a young age. However, we are concerned that if we predictably have a large number of common problems on the exams, it might encourage younger students to take the AMC 12 before they are ready, since a larger proportion of students taking the AMC 12 qualify for the American Invitational Mathematics Examination (AIME). As a consequence, you will likely see an unpredictable fluctuation in the number of common problems from a minimum of about nine to a maximum of about thirteen.

A new policy for AIME qualifying was introduced beginning with the 2000 AMC examinations. Those students taking the AMC 12 and scoring 100 or above qualify, as usual, as do those students scoring in the top 5% on the AMC 12 examination. This new policy is more equitable since it guards against the possibility of a particularly difficult examination, one on which the scores are uniformly lower than normal, skewing the number of AIME qualifiers.

Beginning with the 2004 contest we instituted a similar qualifying system for the students taking the AMC 10 contests. Students scoring in the top 1% of either AMC10 qualify for the AIME, as well as all those who score 120 or more on one of these contests. The requirement is set higher for AMC 10 qualifiers for two reasons:

- First, the AIME can be quite intimidating, and we do not want young students to be discouraged by poor performance on this examination.
- Second, we would like to ensure that any student qualifying for the AIME by virtue of placement on the AMC 10 would likely also qualify for the AIME in subsequent years when taking the AMC 12.

It could be very disappointing for a student to be an AIME qualifier in grade 10 but not in subsequent high school years. By restricting the number of AIME qualifiers from the AMC 10 to about the top 1%, we hope not to exclude any very good young students for whom the AIME would be an appropriate experience, but also not put students in a situation where they do not have much opportunity to succeed.

The AMC will continue to try to improve the experience of students taking the AMC, but the way in which we will do so depends significantly on the feedback that we receive from teachers giving the examinations and from students taking them. Please send any comments you have with regard to the AMC 10 examination to LeRoy Wenstrom (lwenstrom@gmail.com) or Dave Wells, the AMC Chair (dmw8@psu.edu).

MESSAGE FROM THE AMC 12 CHAIR

As part of my first report as the AMC 12 Chair, I would like to share some of my thoughts on what the examination should accomplish. The test should provide a positive problem-solving experience to all participants. It should have interesting problems that require non-traditional thinking, problems that invite the students to keep thinking and talking about them after the test, problems that combine different ideas, possibly from different branches of mathematics, problems that challenge the students to become creative and to go further than they

usually do at school.

In order to provide a positive experience and encourage newcomers, the AMC12 committee strives to make the first 10 problems accessible to almost every participant; at the same time, we try to stay away from textbook-like problems. Among the first 10 problems, the average 12A contestant answered correctly 6.36 and the average 12B contestant answered correctly 6.79. The corresponding numbers for 2008 were 6.13 and 6.87.

On the other hand, the AMC 12 contest is the first step in the road to become a member of the team that represents the U.S. at the International Mathematical Olympiad. As such, the test should contain difficult problems that identify the top 5% of the contestants. The committee tries, with moderate success, to match this 5% with a score of 100 which guarantees qualification for the AIME. In the 2009 AMC 12, we set qualifying scores of 97.5 and 100 in the A and B tests, respectively. Much to the surprise of the committee, the B test turned out to be statistically easier than the A test. About 6.78% of participants taking the A test qualified for the AIME, versus 10.87% of those taking the B test. Overall, 7.98% of the participants qualified for the AIME, compared to 7.0% in 2008. There were 6 and 12 perfect papers in the A and B tests, respectively.

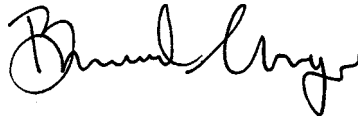

In 2009 we continued our no-calculators policy. Problems that would have been rendered trivial by the use of calculators were now incorporated to the test. Examples of such problems are 12A#25 and 12B#24. In the upcoming years I would expect a moderate increase in the number of these problems. Beginning in 2007 the number of points for a blank response decreased from 2.5 to 1.5 points. This change was brought to increase the number of attempted problems. This year the average contestant attempted 13.77 problems on the 12A test and 14.56 problems on the 12B test. These numbers are fairly close to the corresponding indices in 2008 of 13.97 and 13.52, respectively. But they are still a bit lower than what we would like them to be. A contestant, who only gets one problem wrong, needs to try at least 16 problems to have a score of 100 or more.

I want to take this opportunity to thank Steve Dunbar (AMC Director), Elgin Johnston (previous CAMC Chair), Doug Faires (previous AMC 10 Chair), LeRoy Wenstrom (current AMC 10 Chair), and particularly Dave Wells (previous

MESSAGE FROM THE AMC 12 CHAIR, continued

AMC12 Chair and current CAMC Chair); for showing me “the ropes”, and for all their advice about problem selection and editing.

Finally, in order to achieve the high quality of our contest problems, we are always in need of a large pool of problems. If you or anyone you know would like to help by writing problems, please contact CAMC Chair Dave Wells (dmw8@psu.edu). I would also welcome your comments and suggestions.

AMC 10 B /12 B PARTICIPATING INSTITUTIONS OF HIGHER EDUCATION

During the 2008-2009 school year we again offered the High School Contests through colleges and universities across the nation. Mathematical Association of America members offered the AMC 10 B/12 B to high school students in their area who did not have the contests in their own schools. We were very pleased with the results. We had participation from 43 institutions.

EDYTH MAY SLIFFE AWARDS

DISTINGUISHED HIGH SCHOOL MATHEMATICS TEACHING

The twentieth set of winners of the Edyth May Sliffe Awards for Distinguished High School Mathematics Teaching was announced following the analysis of the 2009 American Mathematics Contest 12 (AMC 12). The twenty-three winners are listed on the next two pages. The award recipients were selected from nominations received from the top three students of each of the 60 highest scoring teams on the AMC 12. These students were asked to recommend a teacher who in their opinion was most responsible for their success on the AMC 12.

These awards are the result of a bequest made to the Mathematical Association of America (MAA) by Edyth May Sliffe, a retired high school teacher of mathematics at Emeryville, California. She made this bequest for the purpose of giving awards to high school mathematics teachers whose teams have done well on the AMC 12. Edyth Sliffe wanted to do this because her students had always done very well on the AMC 12 and received various honors, but she as a teacher had never received any recognition. She had always felt that such teachers should receive some awards.

In addition to a cash prize the award winning teachers receive: a letter of congratulations from the President of the MAA; a certificate signed by the President of the MAA, the Chair of the Committee on the AMC 12, and the Director of the American Mathematics Competitions; a Sliffe pin; a complimentary one-year MAA membership; and a complimentary one-year NCTM (National Council of Teachers of Mathematics) membership. Whenever possible these awards are presented to the winners during an award ceremony arranged by their school administrators.

This Award serves as an excellent illustration of how a single person, in this case Edyth May Sliffe, can have a substantial positive influence nationwide by taking a decisive action to further a cause he or she strongly believes.

AMERICAN MATHEMATICS COMPETITION 8

The 24th Annual American Mathematics Contest 8 (AMC 8) was held on Tuesday, November 18, 2008, and it continued to be received with enthusiasm and support by an overwhelming number of schools, administrators, teachers and students. A total of 148,731 students from 2,296 schools registered for the examination.

The AMC 8 will continue to be a 25-question, 40-minute multiple choice exam that may be given during a regular mathematics class period. The Committee on the American Mathematics Competitions has decided they will no longer allow the use of calculators starting in the year 2008. This means that the last year calculators will be allowed on the AMC 8 was in 2007. As usual, no problems on the test will require the use of a calculator. The nature of the questions will not change from past tests. High scoring students on the 2009 AMC 8 will be invited to participate in the 2010 AMC 10 A & B and/or AMC 12 A & B which are scheduled for Tuesday, February 9, 2010 and/or Wednesday February 24, 2010.

Since the AMC 8 was centrally scored at the Office of the Director it was possible to obtain an enormous amount of data. Please note that the word “recorded” used below should be interpreted as indicating that the results are based on only the items that were mark sensed by the students. Some of the students failed to mark all items such as their grade and sex. The following represents some of the statistics relating to the examination:

TABLE III: 2008 AMC 8 NATIONAL STATISTICS

| | |
|--|---------|
| Number of Answer Forms received - | 148,731 |
| Number of schools sending in reports - | 2,296 |
| Number of students scoring 25 (a perfect paper) -..... | 334 |
| National student average - | 11.45 |
| Number of recorded female participants - | 68,485 |
| Number of recorded male participants - | 77,427 |
| Average of recorded female participants - | 10.85 |
| Average of recorded male participants - | 12.00 |

Grade level average:

| Grade | Number recorded | Average |

NATIONAL SCHOOL AWARDS

COMMITTEE AND DONOR AWARD DESCRIPTIONS

In each of the eleven regions into which the United States and Canada are divided, the five schools with the highest team scores (sum of the highest three scores by participants) are recognized by Donor or Committee Awards.

This year Institutions of Higher Education participated in our AMC 10B/12B, offering supplemental contest sites for area students. Institutions do not qualify for these Awards, but are mentioned here for recognition (*marked with **) when they placed in the top echelon.

- A. **Charles T. Salkind Memorial Silver Cup** — This silver cup is awarded to the school with the highest team score (in any region).
- B. **William H. Fagerstrom Memorial Silver Cup** — This silver cup is awarded to the school with the second highest team score (in any region).
- C. **Committee Bronze Cups** — In each of the regions in which a silver cup is not awarded the Committee on the American Mathematics Competitions provides a Bronze Cup to the school with the highest team score.

SCHOOLS NOT RECEIVING A CUP ARE ELIGIBLE FOR THESE AWARDS

- D. **CAMC Mathematics Books*** — In each of the eleven regions, five books are donated by the Committee on the American Mathematics Competitions to one school having a high team score.
- E. **W. H. Freeman Books*** — In each of the eleven regions, a set of books, donated by W.H. Freeman and Company, San Francisco is awarded to one school having a high team score.
- F. **Mathematics Magazine*** — In each of the eleven regions, a one-year subscription is donated by the Committee on the American Mathematics Competitions to one or more schools having a high team score.

INTRAMURAL AWARDS

- 1. **Certificate of Honor** — This is awarded to schools with a team score of 400 or greater.
- 2. **Certificate of Merit** — This is awarded to schools with a team score of 300-399.

** Distribution of awards is arranged so that schools do not receive duplicates of awards made to them in prior years.*

STUDENT DISTINGUISHED HONOR ROLL

UNITED STATES

AMC 10 A&B

This Student Distinguished Honor Roll includes AMC 10 A&B participants from United States Schools who score **133.5** or above on the AMC 10 A or **141.0** or above on the AMC 10 B. It is based on 1% of the top scoring students. An Honor Roll Pin and a certificate are awarded to these contestants. The listing is by individual score in each region.

AIME - AMERICAN INVITATIONAL MATHEMATICS EXAMINATION

MESSAGE FROM THE AIME CHAIR

Congratulations to all of those who qualified to participate in the AIME. The AIME has many goals, the foremost of which (and the reason for its creation) is to select students for participation in the USA Math Olympiad. The AIME has, however, other equally-important goals. One of these is to provide a transition between the problems of the AMC 10/12 exams, which often involve speed and rapid recall of mathematical techniques and formulae, and the problems of the USAMO, which most often demand creativity and insight. The extended time limit on the AIME provides the AIME committee with an opportunity to create a contest with a blend of these two approaches.

Another goal of the AIME is to provide students with mathematically rigorous and elegant solutions to the problems. The committee generally spends the large majority of its time preparing the solutions, not the problems. The AIME Committee feels that it is important that AIME solutions are models of stylistically correct mathematical exposition, especially since this is the first exposure many younger students have to mathematical writing.

One goal of the committee in constructing the exam is to provide problems accessible to a wide range of students. The committee always seeks to include on the exam problems which can be solved by both direct but time-consuming methods and also insightful, creative (and short) methods. The committee hopes that even students who have found solutions to AIME problems will consult the solutions manual for alternative and often surprising solutions.

Thanks to all those who have contributed their time and effort to creating and reviewing problems for the AIME. In particular, thanks go to the members of the AIME Committee: Jacek Fabrykowski, Chris Jeuell, Jonathan Kane, John Lawlor (outgoing), and Bruce Reznick. Thank you too to the staff in Lincoln who provide such wonderful support in the production of the contest.

Mr. Steven Blasberg

U.S.A. MATHEMATICAL OLYMPIAD

MESSAGE FROM THE USAMO CHAIR

I join the members of the USAMO Committee (Zuming Feng, Lenny Ng, Sam Vandervelde and ex-officio members (Steven Blasberg, Steven Dunbar, David Wells) in extending hearty congratulations to all who participated in the 2009 USAMO and encouragement to those who look forward to taking part next year.

In its current form, the USAMO is patterned after the IMO (International Mathematical Olympiad) in that it is given over a two day period and consists of six problems, each worth 7 points. Also, the range of subjects covered is basically the same as at the IMO. These include algebra, combinatorics, geometry, inequalities, number theory, and blendings of these topics, for example combinatorial geometry. The committee makes every effort to choose engaging and original problems.

In addition to members of the committee, there are panelists – many of whom are former USAMO winners – who contribute and evaluate problems. Finally, the AMC staff makes sure that the whole contest operation runs smoothly. Thanks to all concerned.

QUALIFIERS FOR 2009

UNITED STATES

The 38th U. S. A. Mathematical Olympiad (USAMO) was held April 28-29, 2009. Over 500 AIME participants from more than 290 schools were invited to take the examination on the basis of the criteria indicated in the AMC 10/12 Teachers' Manual. See also the Report of the Director in this Summary. Qualifiers listed by state.

2009 USAMO NATIONAL AWARDS

AKAMAI FOUNDATION SCHOLARSHIPS

For the past seven years, the Akamai Foundation, dedicated to fostering excellence in math education in the United States (grades K-12) has been an ardent supporter of the Mathematical Association of America (MAA). The Foundation was established in 2000 by Akamai Technologies, Inc., the leading global service provider for accelerating content and business processes online, and is funded by Akamai executives, its employees and individuals outside the company. This year the Akamai grant is being used to fund two very important initiatives. One of these initiatives is the allocation of \$45,000 to fund the Akamai Foundation Scholarships. These scholarships are given to the three high school students who have the top scores in the 2009 USAMO. College scholarships of \$20,000, \$15,000, and \$10,000 were awarded by the Foundation at the 38th Annual USAMO Awards Ceremonies held on June 8, 2009.

BALLES USAMO WINNER AWARDS

Robert P. Balles is a lifelong student of mathematics, former community college instructor, and retired businessman. He is an alumnus of Fordham University, Harvard University, and California State University.

He has established an endowed award that each year will honor the USAMO winning students with a \$500 Series I U.S. Savings Bond.

CHINESE GIRLS MATH OLYMPIAD -- CGMO

From left: Carolyn Kim, Patricia Li, Jennifer Iglasias, Shiyu Li, Joy Zheng, Zuming Feng, Cynthia Day, Ramya Rangan, Elizabeth Synge.

2009 CGMO

All seven girls on the U.S. team at the 2009 China Girls Mathematical Olympiad team will be coming home with medals.

Cynthia Day - Bronze, **Carolyn Kim** - Silver, **Shiyu Li** - Gold, **Patricia Li** - Silver, **Ramya Rangan** - Bronze, **Elizabeth Synge** - Silver, **Joy Zheng** - Gold

The CGMO was held in Xiamen on August 11-16, and the team of high school students from the United States took part in the competition for the third time. Once again, the MAA and MSRI co-sponsored the team.

To get ready for the contest in China, which has been held annually since 2002, the young women spent three weeks at the Mathematical Olympiad Summer Program at the University of Nebraska, Lincoln, which helped them develop their problem-solving skills. The preparation also helped boost their confidence for participation in an international competition.

Coaches for the team were Zuming Feng of Phillips Exeter Academy and director of the Mathematical Olympiad Summer Program since 2003, and Jennifer Iglasias, a member of the 2007 and 2008 U.S. CGMO teams.

Other sponsors of the U.S. teams are Microsoft, Google, Akamai Foundation, The Shiing-Shen Chern Foundation for Mathematical Research, and The Sunlin and Priscilla Chou Foundation.

MATHEMATICAL OLYMPIAD SUMMER PROGRAM PARTICIPANTS

This year's Mathematical Olympiad Summer Program (MOSP) will be held on the campus of the University of Nebraska-Lincoln June 10-July 3, 2009. Students will be treated to classes on advanced mathematical topics, special guest speakers, mathematical contest training, and related social and mathematical activities.

2009 INTERNATIONAL MATHEMATICAL OLYMPIAD

The 50th International Mathematical Olympiad (IMO) was held July 12 - July 22, 2009 in Bremen, Germany. The International Mathematical Olympiad (IMO) is the pre-eminent mathematical competition for high-school age students from around the world. The IMO consists of solving 6 extremely challenging mathematical problems in a 9-hour competition administered over two days. More information about the 50th International Mathematical Olympiad is at: <http://imo-official.org>

Overall, the six members of the USA team won 2 Gold medals and 4 Silver medals. The USA team ranked 6th among all 104 participating countries in total points. The International Mathematical Olympiad has 6 difficult problems solved over two days of competitions. Each problem is worth 7 points for a total of 42 points.

- **John Berman**, a graduate of John T. Hoggard High School, Wilmington, North Carolina, won a Gold Medal with 35 points.
- **Wenyu Cao**, a student at Phillips Academy, Andover, Massachusetts received a Silver Medal with 25 points.
- **Eric Larson**, who graduated from South Eugene High School, Eugene, Oregon won a Gold Medal with 34 points.
- **Delong Meng** who graduated from Baton Rouge Magnet School, Baton Rouge, Louisiana won a Silver Medal with 29 points
- **Evan O'Dorney**, who attends the Venture School and is from Danville California, received a Silver Medal with 30 points.
- **Qinxuan Pan**, who graduated from Wooton High School in Rockville, Maryland won a Silver Medal with 29 points.

IMO, Continued

The USA team has consistently finished in the top ten teams for the last ten years at the IMO. At this year's IMO 565 young mathematicians from 104 countries competed in solving problems posed in a test administered on July 15 and July 16. Overall, the IMO awarded 49 gold medals, 98 silver and 135 bronze medals.

With their medals, from left: Delong Meng; silver, Evan O'Dorney; silver, John Berman; gold, Qinxuan Pan; silver, Wenyu Cao; silver, Eric Larson; gold.

BALLES TEAM AWARDS

Robert P. Balles has established an award that will honor the student participants in the annual International Mathematical Olympiad (IMO) with a \$1,000 Series I U.S. Savings Bond. Each Series I U.S. Savings Bond features a prominent American who has contributed to the history of the country. Appropriately, this particular denomination features Albert Einstein.

The MAA gratefully thanks Mr. Balles for his generosity in the recognition of the six extraordinary student mathematicians who compete annually on behalf of this country against the rest of the world's student mathematical power. The IMO Team for 2009 is: **John Berman**, a graduate of John T. Hoggard High School, Wilmington, North Carolina, **Wenyu Cao**, a student at Phillips Academy, Andover, Massachusetts, **Eric Larson**, who graduated from South Eugene High School, Eugene, Oregon, **Delong Meng** who graduated from Baton Rouge Magnet School, Baton Rouge, Louisiana, **Evan O'Dorney**, who attends the Venture School and is from Danville California, **Qinxuan Pan**, who graduated from Wootton High School in Rockville, Maryland.
