

1067-Z1-2035 **Kate G McGivney*** (kgmcgi@ship.edu), 1871 Old Main Dr., Shippensburg University,
Shippensburg, PA 17257. *A History of Math Seminar Course for Future Secondary
Teachers*. Preliminary report.

In this talk I will discuss a seminar-style model that I implemented in my history of math course for an audience that was primarily future secondary mathematics teachers. A key goal of the course was to provide an opportunity for students to study historical topics while reviewing secondary school level mathematics. Strategies for getting students to become actively engaged in the readings and learning process will be shared. (Received September 22, 2010)
