Ryan S Higginbottom* (ryan.higginbottom@washjeff.edu). *From Zero to L^AT_EX in Three Weeks: Teaching Scientific Typesetting to Undergraduates.*

For the past two years, I have offered a class on Scientific Typesetting during my school's January term. I will discuss the content and methodology of the course along with some of the assignments my students completed. I will also explain what made the class significantly better the second time it was offered. (Received September 22, 2010)
