WeBWorK

WHAT IS WeBWorK?

WeBWorK is a well-tested, open-source homework system for delivering individualized homework and exam problems over the web. Students receive immediate feedback while instructors can ask the questions they want to ask.

- Over 30,000 customizable problems in the Open Problem Library
- Customizable problems include interactive graphs, hints, and open-ended questions
- Content ranges from basic algebra and calculus to linear algebra and more
- Integration with most learning management systems

USING WeBWorK

WeBWorK is software that runs on a server. Many universities host their own WeBWorK servers, while others subscribe to MAA's service.

- Find out more about MAA's WeBWorK service.
- Join one of our Zoom sessions to get your questions answered

THE WeBWork COMMUNITY

The WeBWork Project is a large volunteer community which contributes new homework problems, responds to help requests on the forum, and communicates WeBWork advancements and research at conferences and university settings.
