Preface	xiii
1 Brainteasers	1
2 Puzzles, Games, and Strategies	21
A game with graphs	21
Dudeney’s hinge puzzle	22
Prime stuffer	24
Date cubes	25
Two “impossible” figures	26
Sangakus	26
Key ring puzzle	27
Matchboxes	28
Connector	29
Close the door!	32
An ugly picture	35
Superdokus	38
Geomagic squares	40
The 16 holes puzzle	43
A mathematical card trick	44
The Penrose triple star	46
Come loose and change	48
The Black game	49
Complex balancing	52
Fiddling with identical twins	56
The divisor game	62
The rotating cube	65
Three is too many	66

	Problem 59 from the <i>Scottish Book</i>	67
	One hundred prisoners	70
	Pygram	75
	The liar's guessing game	76
3	Mathematics and Art	83
	Convex and concave	83
	A handful of universe	85
	Possible or not?	89
	Moorish art	92
	The mathematics of Popke Bakker	98
	Bernini's ellipse?	103
	One hundred thousand billion poems	106
	Instructive mistakes	109
4	Geometry	117
	Pythagoras by folding	117
	Ann's smart proof	118
	Square of squares	120
	Imprisoned squares	123
	The pancake	130
	Fagnano's problem	132
	Keep rolling	135
	Beauty contest winning theorem	137
	Alexander's horned sphere	142
	How big is the earth?	145
	A rope around the earth	148
	It seems improbable, but . . .	153
	Integrating by hats	154
	A proof returned	157
	Euler's formula	159
	The platonic system	164
	Platonic-like solids	168
	Penrose tiles and the golden ratio	172
	Brouwer's fixed point theorem	179
	Windmill wings	187
5	Numbers	191
	Weighing letters	191
	The snail and the elastic band	194

Contents**xi**

Clever pruning in infinity	197
Proof by rotation?	199
An awkward mathematical problem	202
Nines, nines, more nines	204
Is π normal?	207
Coster numbers	209
Continued fractions	212
The IQ formula	215
Primal fractions	219
The <i>abc</i> conjecture	222
The money machine	225
6 Dionigmas.....	231
7 Solutions.....	245
Bibliography	295
About the Editors	301
